## 1. Executive Summary

Any version of this report in any other language than English is an unverified translation, and in case of differences the English version shall take precedence.

Tan Thuan Dong farm is under surveillance for ASC certification. This report only covers the surveillance assessment of Tan Thuan Dong farm.

Tan Thuan Dong farm site was audited against principle one to six in one day. The audit was carried out by one auditors in Vietnamese.

During the environmental assessment, 0 major, 3 minor (0 closed prior to publication of this report) and 0 recommendations were raised. During the social assessment, inspector checked the corrective actions of NC found in the first certification in Dec 2012 and found compliance. So, 0 major, 0 minor ( 0 closed prior to publication of this report) and 0 recommendation was raised.

Besides the grow-out, the scope of the assessment includes the harvest, landing and subcontracted transport in sealed tanks to Vinh Hoan processing plant. COC certification is required from the point of unloading from the sealed tanks. The farm is under own and management of Vinh Hoan,

IMO determines that all the requirements of the standard are sufficiently met and has confirmed continued certification of Tan Thuan Dong farm. The current certificate remains valid and will expire on Dec, 2015.

## 3. Background on the applicant farm

Vinh Hoan Corporation is an Vietnamese processor and exporter of Pangasius/basa fish (*Pangasius Hypophthalmus* and *Pangasius Bocourti*). The company is a priority choice of foreign importers for Pangasius fillet and value added products from Pangasius. Vinh Hoan is operating in Dong Thap Province - Mekong Delta. The three factories of the company currently produce with production capacity 500 MT of raw material per day. It has applied an integrated production of Pangasius fillet from farming to processing. Tan Tuan Dong farm is one of the fish ponds of company located in Dong Dinh Hamlet, Tan Thuan Dong Commune, Cao Lanh city, Dong Thap Province of 20.7ha to supply 4579 tons tons of raw material. They have their own feed mill, Vinh Hoan1, to supply fish feed to the company owned farms and their raw material suppliers and hatchery, Thoi Lai, to produce fingerlings of Pangasius.

Tan Thuan Dong farm is ASC certified in Dec 2012.

Production capacity of the farm: 4579 tons

## 4. Scope

The assessment was carried out against the ASC Pangasius Standard v1.0.

The species produced at the farm is *Pangasius hypophthalmus*.

Audit scope: Tan Thuan Dong farm (single site), *Pangasius*.

Receiving water bodies delineations: Tien River

## 5. Audit plan

Action	Locations	Persons	Dates*
Initial certification	Tan Thuan Dong	TXS	10-11.12.2012
Surveillance Audit (principle 1-6)	Tan Thuan Dong	TXS (lead)	17&18.12.2013
Surveillance Audit (principle 7)	Tan Thuan Dong	TXS (lead)	17&18.12.2013
Stakeholder & community meetings/interviews	NA		
Surveillance report to ASC	IMO Head office	TOS	31.01.2014

\* The previous versions of the report are not public.

The audit was carried out with Ms. Thuong - Coordinator. Other staff/workers such as Mr. Trung – Vice General Director, Ms. Phuong – Farm General Manager joined parts of the audit, depending on their responsibility and the criteria being assessed. Other staff/workers joined parts of the audit, depending on their responsibility and the criteria being assessed.

The previous audit was done in 10-11.12.2012 with 4 minors nonconformities and they were corrected prior to certification decision.

## 6. Findings

Details of the evidence of compliance found during the audit for each individual criteria of the standard can be found in Annex 1.

Any outstanding non-conformities and their respective action plans are listed under section 10. of this report. Any recommendations or closed non-conformities are not listed here and are part of Annex 1.

For details of stakeholder submissions received throughout the certification process, please see Annex 5.

All water measurements and analysis were found to be sufficiently compliant.

In general, the farm under assessment was well prepared for the audit with all pre-audit data available prior to the audit. The auditors had open access to all documentation, the farm and staff/workers as required. The farm is well managed and documented and staff trained to implement the internal procedures

A description of the certification status can be found under section 8. of this report.

## 7. Evaluation results

Details of the evidence of compliance for each criteria in the standard can be found in Annex 1.

## 8. Decision

IMO confirms the current certification status of Tan Thuan Dong farm. The certificate will expire on 09 December 2016.

## 9. Determination of the start of the COC

### Risk assessment - COC within the farm

**L** – low risk: no such activities or a controlled system in place (e.g. license)

**M** – medium risk: such activities occur within the farm but there is a good system in place

**H** – high risk: such activities occur, there is a risk of mixing and the system in place is not sufficient

Ref to CR	Integrity of certified products	Associated risk	Rationale
17.5.1	System in use	L	Control system is in placed accrodg to Global GAP and AquaGAP standards
17.5.1.2	The opportunity of substitution prior to or at harvesting	L	
17.5.1.3	The possibility of introducing product from outside the unit of certification	L	Vinh Hoan has some farmed that are being certified by other standards.
17.5.1.4	Robustness of the management system	M	Strong management system
17.5.1.5	Any transshipment activities taking place	L	Using the boat of subcontractors under Vinh Hoan staffs control
17.5.1.6	The number and/or location of points of harvest	L	Harvest taken at every pond point.
	Overall risk estimation	L	

If the CAB determines the system is sufficient, products can enter into further certified chains of custody and be eligible to carry the ASC Label.

Scope of aquaculture certificate, including the points of change of ownership after which COC certification is needed:
The scope of the assessment includes ASC COC certification is required from the point of unloading from subcontracted transport boats.
No retrospective approval has been applied for. Only products harvested as of the date of

certification are approved to carry the ASC logo.

If the CAB determines the system is not sufficient, products may not enter into further certified chains of custody and are not eligible to carry the ASC Label.

The following products may not enter into further certified chains of custody and are not eligible to carry the ASC Label:

None

This determination will remain in force until revised by the CAB in a subsequent audit.

## 10. Non-conformity report(s)

Producer: Vinh Hoan: Tan Thuan Dong farm					
N° of CC	Year	Cat.	Non-conformity (summary)	Action plan	Deadline
3.2.1e	2013	m	<p><u>DO measurement</u>            DDDO measurement            Witness the farm taken DO in the morning and in the afternoon:            Farm value: morning - 6.7 (27.3toC), afternoon - 6.7 (26.7toC)            Auditor value: morning - 6.8 (27.7toC), afternoon - 6.8 (26.8toC)            DDDO of farm is 0.85% and DDDO of auditor 0.65%. The values were out of range measurement. Not compliant.</p>	<p><u>Root Cause:</u> witnessed values were out of range  <u>Corrective Action:</u> work to improve the DDDO values and ensure they fall within the compliant range  <u>Timeframe:</u> during next audit</p>	Verification during next audit
6.4.4d	2013	m	<p><u>Mortality event record</u>            Record of dead fish, antibiotics used and withdrawal period was kept. However, the report of all mortality events exceeding threshold has not been established. Ex: Check farm diary in Pond 13 in 17.01.2013, dead fish was 0.45% instead of 0.07%. This was mortality event according to Health</p>	<p><u>Root Cause:</u> not all mortality events were recorded  <u>Corrective Action:</u> record all mortality events exceeding the threshold  <u>Timeframe:</u> during next audit</p>	Verification during next audit

<b>Producer:</b> Vinh Hoan: Tan Thuan Dong farm					
N° of CC	Year	Cat.	Non-conformity (summary)	Action plan	Deadline
			Management Plan - Threshold.		

*N° of CC* Number of not fulfilled compliance criteria (e.g. 1.1.1). In case of doubts indicate at least chapter of report.  
*Year* First year when the non-conformity has been observed.  
*Cat.* Sanction Category: rate using rec, min or Maj  
*Non-conformity* Discrepancy to standard.  
*Action plan* Measure to correct non-conformity stated by company and to be approved by IMO. Implementation of corrective measure to be completed by deadline.  
*Deadline* Date when IMO will assess the implementation of the corrective measure.  
*Status* Status of implementation of corrective measure: *done*, *partly done*, *not done*  
*rec* Recommendation (no action plan required)  
*min* Minor non-conformity: see Annex 3  
*Maj* Major non-conformity: see Annex 3

## 11. Next scheduled audit

Next planned surveillance audit; (year, month):	August 2014
Complete re-certification every three years; at the latest (year):	June 2015

IMO has the right to carry out additional unannounced audits according to the IMO standard operation procedures (SOPs). Likewise, an additional audit can be carried out within the framework of a document review.

<b>Operator's comments (optional):</b> none
The operator has confirmed their agreement with this report and has committed to implementing the action plan/corrective measures. The final certification decision is made by the responsible certification officer at IMO.

<b>Confirmation of operator</b>	
Thuong Dang name & signature	Tan Thuan Dong, 18.12.2013 date, location
<b>Confirmation of auditor</b>

## Annexes

### **Annex 1a. Evaluation results Pangasius P1 - 6**

Please see separate document. The following information is confidential and has been removed from the public report:

- Water monitoring data and analysis

### **Annex 2a. Evaluation results Pangasius P 7**

Please see separate document.

## **Annex 3. Classification of minor / major non-conformities**

### **Minor non-conformities**

a) For initial certification, the CAB may recommend the applicant for certification once an action plan to address non-conformity has been agreed to by both the client and the CAB.

i. The action plan shall include a brief description of:

A. The root cause(s) of the non-conformity

B. The corrective action(s) to be taken is intended to satisfactorily address the non-conformity

C. The timeframe for implementation of corrective action(s)

ii. Minor non-conformities may be extended once for a maximum period of one (1) year if full implementation of corrective action was not possible due to circumstances beyond the control of the client.

b) The CAB should raise a major non-conformity where minor non-conformities are repeatedly raised against a particular requirement.

c) The CAB shall require that minor non-conformities raised during surveillance audits are satisfactorily addressed in one (1) year.

### **Major non-conformities**

a) The CAB shall require that major non-conformities shall be satisfactorily addressed by an applicant:

i. Prior to certification being granted.

ii. Within three months of the date of the audit or a full re-audit shall be required.

iii. That the root cause of the non-conformity is identified.

b) In the case of a major non-conformity raised during the period of validity of a certificate, the CAB shall require:

i. That the certificate holder satisfactorily addresses the non-conformity within a maximum of three (3) months

ii. Major non-conformities may be extended once for a maximum period of another three months if full implementation of corrective action was not possible due to circumstances beyond the control of the client

iii. That the root cause of the non-conformity is identified

## Annex 4. Form 1 – Request for Interpretation or Variance

*This form is for the submission of requests by CABs to ASC to request interpretations of ASC normative requirements and/or requests for variance from specific normative requirements.*

### I CAB Request

1.1 Name of CAB	1.2 Date of Submission	1.3 CAB Contact Person	1.4 Email Address of CAB Contact Person
1.5 ASC Document Reference			
1.6 Background (Provide full explanation of the issue)			
1.7 Recommended Action/Decision			

### II ASC Determination

2.1 Status	2.2 Date of ASC Determination
<input type="checkbox"/> Closed	
2.3 ASC Determination on Variance	
2.3 ASC Interpretation	

## Annex 5. Stakeholder submissions

Including written or other documented information and CAB written responses to each submission.

Public consultation period	Stakeholder submission	IMO Response
Audit announcement (30 days prior to audit)	NA	
Draft public report (10 days from report publication)	NA	

13 A ASC technical annex VH Tan Thuan Dong

criteria	Date of finding	recomen-dation	minor NC	major NC	NC	action plan	deadline	action plan approved by IMO	Status of implementation of action plan		
						Root Cause: xxx Corrective Action: xxx Timeframe: xxx			initial/recertification	surveillance I	surveillance II
									2012	2013	2014
1.1.4b	2012		1		<u>Permit to use water</u> Permit to use water was applied to Dong Thap People Committee on 30.11.2012. Farm keeps the receipt of Dong Thap People Committee.	<u>Root Cause and corrective action:</u> The company has already applied the registering documents for the Department of Natural Resources and Environment of Dong Thap province (DONRE) to be allowed to use water surface for aquaculture purposes in November 2012. The DONRE is reviewing the documents while the audit happened. Therefore, the company had not yet granted a permit. A staff from DONRE has verified our farm and issued the permit of using water surface in the end of December 2012. Evidence: please see the permit of using water surface water in the attached file.	03. Feb 13	ok	evidence submitted 15.01.2013		
2.4.1 b	2012		1		<u>Water allocation limit</u> The application for water allocation has been submitted in 30.11.2012 to Environmental Resource Department Dong Thap. The water allocation limits has not yet been issued.	<u>Root Cause and corrective action:</u> The company has already applied the registering documents for the Department of Natural Resources and Environment of Dong Thap province (DONRE) to be allowed to use water surface for aquaculture purposes in November 2012. The DONRE is reviewing the documents while the audit happened. Therefore, the company had not yet granted a permit. A staff from DONRE has verified our farm and issued the permit of using water surface in the end of December 2012. Evidence: please see the permit of using water surface water in the attached file.	03. Feb 13	ok	evidence submitted 15.01.2013		
2.4.1e	2012		1		<u>Water allocation limit</u> Permit to use water has not been issued by government. Therefore, the comparison between farm's water intake against the water allocation limits could not be done.	<u>Root Cause and corrective action:</u> The company has already applied the registering documents for the Department of Natural Resources and Environment of Dong Thap province (DONRE) to be allowed to use water surface for aquaculture purposes in November 2012. The DONRE is reviewing the documents while the audit happened. Therefore, the company had not yet granted a permit. A staff from DONRE has verified our farm and issued the permit of using water surface in the end of December 2012. Evidence: please see the permit of using water surface water in the attached file.	verification on next audit	ok	evidence submitted 15.01.2013		
4.6.1c	2012		1		<u>Bund</u> Onsite visit. No signs of collapse in the farm. However, bunds made by sand bag between the sedimentation pond and public canal had leakage.	<u>Root Cause:</u> The bund at sedimentation pond was repaired by the sandbags but not enough to cover all the leaked points. <u>Corrective Action:</u> The sandbags were taken at the leaked areas and we use the Cajuput wood for covering all erosion points. We check the bund weekly and record it in the "bund checking record" form.	verification on next audit	ok	evidence submitted 15.01.2013		
3.2.1d	2013		1		<u>DDDO measurement</u> Witness the farm taken DO in the morning and in the afternoon: Farm value: morning - 6.7 (27.3toC), afternoon - 6.7 (26.7toC)	Root Cause: witnessed values were out of range Corrective Action: work to improve the DDDO values and ensure they fall within the compliant range Timeframe: during next audit	verification on next audit	ok	NA	ok	
6.4.4d	2013		1		<u>Mortality event record</u> Record of deadfish, antibiotics used and withdrawal period was kept. However, the report of all mortality events exceeding threshold has not been established. Ex: Check farm diary in Pond 13 in 17.01.2013, deadfish was 0.45% instead of 0.07%. This was mortality event according to Health Management Plan - Threshold.	Root Cause: not all mortality events were recorded Corrective Action: record all mortality events exceeding the threshold Timeframe: during next audit	verification on next audit	ok	NA	ok	
Total			0	5	0	examples: see report (for minors) corrective measure implemented (for majors)	see report	ok na	open done		

Scope: *Pangasinanodon hypophthalmus, Pangasius bocourti*

**Preamble:**

In order to determine the level of compliance against the ASC Pangasius Standard it is essential to use information of completed crop cycle(s), or on a specific point in time in the crop (e.g. stocking) for several requirements. For this reason, for first audits, it is necessary for farms to present full data on at least one or more completed crop cycle(s) per site at the time of the assessment.

**Therefore, at the time of the first audit:**

- farmer must be able to show full records (e.g. feed-use, mortality rate, etc.) of at least 1 completed crop cycle per site (i.e. from stocking to harvest) and the relevant information for all the crops stocked after having stocked that crop
- certifier must use these records of each site to calculate the level of compliance of the relevant indicators

**Applicable to all relevant requirements in this Audit Manual:**

- Client:** At first audit: data of at least 1 full crop cycle per site must be made available to certifier.
- Auditor:** At first audit: data of at least 1 full crop cycle per site must be used to determine compliance.

add "1" per criteria in applicable column below:

PRINCIPLE 1. LOCATE AND OPERATE FARMS WITHIN ESTABLISHED LOCAL AND NATIONAL LEGAL FRAMEWORKS			Evaluation results			Surveillance 1						
1.1 Criteria: Local and national regulations			Description			initial/recertification						
Compliance Criteria (Required Client Actions):			Auditor Evaluation (Required CB Actions):			ok	minor	major	Description	ok	minor	major
1.1.1	<b>Indicator:</b> Presence of all pertinent permits and registrations required by local and national authorities <b>Requirement:</b> Yes <b>Applicability:</b> All	a. Maintain records to show the farm has all registrations as required by local and national authorities.	A. Verify farm has all registrations as required by local and national authorities.	Land is leased from Dong Thap People's Committee and under their total management. The land leasing contract valid between Vinh Hoan and Dong Thap government is from 01.02.2008 - 01.02.2028. Farm located in Tan Thuan Dong Ward is allowed to aquaculture according to	1			Land is rent from Dong Thap People Committee government. The contract no. 02/HĐ/TĐ issued by Dong Thap People Committee and valid is from 1.2.2008 to 1.2.2018. Total area is 207376.4m2.	1			
		b. Obtain an aquaculture farming licence (as applicable).	B. Verify farm has aquaculture farming licence (as applicable).	Farm is allowed to aquaculture according to the Decision 206/QĐ-UBND.NĐ of Dong Thap People Committee issued on 22.5.2012	1			Dong Thap Decision No.262QĐ/UBND HC regulates Dong Dinh Hamlet, Tan Thuan Dong - the place that Tan Thuan Dong farm located, is allowed the aquaculture farming.	1			
		c. Obtain a commercial licence (as applicable).	C. Verify farm has a commercial licence (as applicable).	Farm is allowed to aquaculture. This registration was issued on 17.4.2007, owner registration was issued on 27.12.2010.	1			Commercial Licence is first issued by Dong Thap Planning Department by 17.4.2007 and 6th issued by 4.7.2013	1			
		d. Obtain any other contracts, licences, or permits as required by local and national authorities (also see 1.1.3. and 1.1.4).	D. Verify compliance.	See A, B, C	1			No other licences required	1			
1.1.2	<b>Indicator:</b> Presence of documents proving compliance with pertinent tax laws <b>Requirement:</b> Yes <b>Applicability:</b> All	a. Maintain records of tax payments to appropriate authorities (e.g. land use tax, water use tax, revenue tax) for the last 12 months. For first audits, farm records must cover ≥ 6 months	A. Verify client has records of tax payments to appropriate authorities. (Note: For integrated systems, tax may only apply at the processing level. Nonetheless clients must show evidence of tax payment)	Land tax (207.376.4m2). Land tax will be collected since 01.02.2008 according to the Minute of Finance Ministry of Dong Thap - Decision No.228/STC-QLCS.G issued on 20.11.2012. However, no more legal instruction from Tax Agency about this issue. Business income tax: paid by quarter. Check the tax from 3rd quarter of 2011	1			Farm has paid land tax for land. Land tax was paid from 2008 to March 2013. Receipt of land tax in 2013 was checked. Business tax is paid once a year. Business tax receipts from Jan to Sep 2013 were checked.	1			
		b. Keep updated information on applicable tax laws for the jurisdiction in which the farm is operating.	B. Verify client has current tax law information and a basic understanding of tax requirements.	Company has to be two kinds of tax and understanding of tax requirement.	1			Client has current tax law information and a basic understanding of tax requirement.	1			
1.1.3	<b>Indicator:</b> Presence of documents proving compliance with pertinent water discharge (including water effluents) regulations <b>Requirement:</b> Yes <b>Applicability:</b> Ponds	<b>Instruction to Clients for Indicator 1.1.3 - Showing Compliance with Water Discharge Regulations</b> Indicator 1.1.3 requires the farm to show compliance with all water discharge regulations at the local and national level. If the authoritative regulatory agency has imposed limits on farm water discharge (i.e. by issuing a discharge permit or other comparable mechanism) the obligation shall rest with the client to demonstrate compliance. Four types of evidence are acceptable: a. Statement by a fully independent ISO 17025 accredited laboratory showing that their staff collected samples at discharge; b. Results of water testing from a fully independent ISO 17025 accredited laboratory; c. Relevant legal documents showing compliance; or d. Statement from local authorities with competence on water quality and capacity to test water quality parameters stating compliance.		Where regulations require monitoring of farm water discharge, that monitoring shall be conducted annually (at a minimum) or more frequently if required under local or national regulations. If there is insufficient evidence to show that the farm complies with water discharge regulations then the auditor will raise a non-conformity.  Note 1: The ASC Pangasius Standard also specifies criteria for some water quality parameters. These are considered separately under Principle 3 below.								
		a. Submit a statement by a fully independent ISO 17025 accredited laboratory showing that their staff collected samples at discharge	A. Verify compliance. If (a), (c) or (d), then enter 'not applicable' for (a).	Six months periodical environmental report were done by Vinh Hoan and approved by Environmental Protection Agency Dong Thap on July 2012. The criteria are BOD5, COD, TSS, Amoni, Chlorua, Coliforms and showed compliance	1			Water discharge were yearly sent to the external lab named Technology, Natural Resources and Environment Monitoring Centre - Dong Thap - ISO 17025 certified and tested according the National Regulation - Decision 44/2010/TT-BNNPTNT and QCVN 08:2008/ĐTNMT. The minutes	1			
		b. Submit results of water testing from a fully independent ISO 17025 accredited laboratory.	B. Verify compliance. If (a), (c) or (d), then enter 'not applicable' for (b).	TSS, BOD5, PO4, NH3 at water discharged were tested by internal lab (ISO 17025 certified). The Central monitoring technical resources and environment Dong Thap (ISO 17025 certified) did the TN, TP, TAN, CO2, H2S, Solube	1			Results showed compliant according the National Regulation - Decision 44/2010/TT-BNNPTNT and QCVN 08:2008/ĐTNMT.	1			
		c. Submit relevant legal documents showing compliance.	C. Verify compliance. If (a), (b) or (d), then enter 'not applicable' for (c).	Six months periodical environmental report were done by Vinh Hoan and approved by Environmental Protection Agency Dong Thap on July 2012.	1			According to 1144/2010 - BNNPTNT issued in 22.07.2010, the test results are done every year by external Lab named Technology, Natural Resources and Environment Monitoring Centre - Dong Thap - ISO 17025	1			
		d. Obtain a statement from local authorities with competence on water quality and capacity to test water quality parameters stating compliance.	D. Verify compliance. If (a), (b) or (c), then enter 'not applicable' for (d).	NA	1			N/A				
1.1.4	<b>Indicator:</b> Presence of documents proving compliance with local and national legal regulations on land and water use <b>Requirement:</b> Yes <b>Applicability:</b> All	a. For ponds, maintain copies of land ownership or contract of lease. For pens or cages, maintain permits showing allowance to farm in the designated location.	A. Verify client has documents to show legal access to and use of land and water.	Decision 206/QĐ-UBND.NĐ of Dong Thap People Committee issued on 22.5.2012. Map of the farm issued by Ward 4, People Committee, Cao Lanh City, Dong Thap province.	1			See 1.1.1 for land use. Water use permit No. 1256/GP-UBND was issued Dong Thap People Committee in 28.12.2012 allowed to use 25431m3/day and night	1			
		b. Obtain required permits to use and discharge water for the purposes of operating a farm. Comply with any and all permit restrictions stated therein (e.g. maximum capacity of production, water allocation volumes, etc).	B. Verify farm has obtained permits and complies with the terms.	Permit to use water was applied to Dong Thap People Committee on 30.11.2012. Farm keeps the receipt of Dong Thap People Committee.	1			Water use permit No. 1256/GP-UBND was issued Dong Thap People Committee in 28.12.2012 allowed to use 25431m3/day and night, valid in 5 year since 28.12.2012.	1			
		c. If the farm operates in a country and region with no permitting system for land and water use, provide documentary evidence (e.g. letter from authorities) attesting to this fact.	C. As applicable, review evidence to confirm that the farm does not need permits for land and water use in the country and region of operation.	NA	1			N/A				
PRINCIPLE 2. FARMS MUST BE LOCATED, DESIGNED, CONSTRUCTED AND MANAGED TO AVOID (OR, AT LEAST, MINIMIZE) THEIR NEGATIVE IMPACTS ON OTHER USERS AND THE ENVIRONMENT												
2.1 Criteria: Meeting official development plans												
2.1.1	<b>Indicator:</b> Farms (4) located in approved aquaculture development areas <b>Requirement:</b> Yes <b>Applicability:</b> All	a. Provide a detailed map of the farm with at least 4 GPS coordinates.	A. Review map to confirm farm location and accuracy of GPS coordinates. If possible, verify spatial information using Google Map, satellite images or similar means.	Farm location and GPS coordinates are reviewed.	1			Check GPS coordinates of the farm	1			
		b. Provide official plans that identify approved aquaculture development areas. If there are none, obtain a statement from the authorities as confirmation.	B. Review plans. If farm states there is no plan, confirm that the country and region of operation does not have approved aquaculture development areas.	Plan approved by the decision No.262/QĐ-UBND.HC issued on 12.03.2009 mentioned the area Dong Dinh - Tan Thuan Dong Ward is allowed to do aquaculture.	1			Dong Thap Decision No.262QĐ/UBND HC regulates Dong Dinh Hamlet, Tan Thuan Dong - the place that Tan Thuan Dong farm located, is allowed the aquaculture farming.	1			

		c. Show that the farm is located in an area approved for aquaculture using evidence from maps or list of officially designated locations.	C. Verify farm is located in an approved aquaculture area. If there are no such areas, auditor response is 'not applicable'.	See B	1	See 2.1.1 b	1			
Footnote	[4] Pond, cage and pen-based facilities									
2.2 Criteria: Conversion of natural ecosystems										
Compliance Criteria (Required Client Actions):					Auditor Evaluation (Required CB Actions):					
2.2.1	<p><b>Indicator:</b> For ponds [5], evidence [6] that only land that has been allocated to agriculture or aquaculture for 10 years prior is used for new pond development or for farm expansion</p> <p><b>Requirement:</b> Yes</p> <p><b>Applicability:</b> Ponds established after August 31, 2010</p>	a. Provide a declaration that identifies the month and year of farm construction, and specify dates of any subsequent farm expansions.	A. Verify the declaration gives date of farm construction and any subsequent expansions. Identify any ponds established after August 31, 2010.	Farm declaration about construction was 24.3.2008. Finished date was 6.6.2010.	1	Contract with construction company - Dong Duc showed the dates of pond construction in 24.03.2008. Minutes of take over the ponds (1-7) were signed in 11.7.2009, ponds (8,9) in 15.9.2009, ponds (11-13) was completed in 5.6.2010.	1			
		b. If the farm (or any of its expansions) was constructed after August 31, 2010, obtain a statement/historical land use map from a government organization indicating that the land was agriculture or aquaculture land for 10 years prior to their construction.	B. Review evidence from government organizations. Where land-use maps or spatial information is provided, cross-check against map of farm (see 2.1.1).	N/A	1	The contract no. 02 HD/TD issued by Dong Thap People's Committee and valid is from 1.2.2008 to 1.2.2018 (total area is 207376.4m2) show the status of pond in the farm. There is correct information comparing to the farm map and the Environmental Impact Assessment Report in 2013 approved by Dong Thap Environment and Resources Department.	1			
		c. Verify accuracy of (a) and (b) above during interviews with local community members to confirm there is no evidence for conversion of wetlands or any other ecosystem (other than agriculture or aquaculture land) as applicable under Indicator 2.2.1.	C. Verify accuracy of (a) and (b) above during interviews with local community members to confirm there is no evidence for conversion of wetlands or any other ecosystem (other than agriculture or aquaculture land) as applicable under Indicator 2.2.1.	According to the stakeholder meeting, the farm compound including the ponds and constructions were established in 2008.	1	Community interviewing confirms signed statement. The last construction was done four or five years ago.	1			
Footnote	[5] For Ponds established after the publication of the PAD standards.									
Footnote	[6] From government organizations.									
2.2.2	<p><b>Indicator:</b> Evidence that a contribution of at least USD 50.50 per ton of fish produced has been paid to the environmental and social restoration fund [7] annually</p> <p><b>Requirement:</b> Yes</p> <p><b>Applicability:</b> All</p>	a. Submit a signed letter to the ASC committing to pay a contribution to the fund for all certified fish harvested from the day of first certification.	A. Verify the farm has signed a letter stating commitment to contribute to the fund.	Letter has signed by Deputy General Director - Ms. Vi Tam on 14th June 2012 and sent to ASC on 15th June 2012	1	Letter stating commitment signed by Deputy General Director in 14.6.2012	1			
		b. Retain the receipt from ASC showing that farm's signed letter was received.	B. Verify evidence that ASC has received the letter.	Bas Geerts confirmed on 15th June 2012	1	ASC email is confirmed in 15.6.2012 by Standard Director	1			
		c. Retain evidence of all payments made into the fund.	C. Verify farm has made payment(s) into the fund. As soon as ASC has set-up the fund, this information will be posted on the ASC website.	N/A. The fund has not been set up yet.	1	N/A - Fund is not set up yet	1			
Footnote	[7] To be identified by the Aquaculture Stewardship Council (ASC). If a fund has yet to be created and recognized by ASC at the time of auditing, then requirement 2.2.2 will not be considered.									
2.2.3	<p><b>Indicator:</b> Evidence [8] that no earth has been discharged into common [9] water bodies</p> <p><b>Requirement:</b> Yes</p> <p><b>Applicability:</b> Ponds established after August 31, 2010</p>	a. Provide a declaration stating that the farm has not discharged earth into common water bodies after August 31, 2010.	A. Verify the farm has made a declaration.	N/A	1	N/A. Ponds established in 16.11.2007	1			
		b. For construction activities listed in 2.2.1a that involved earth moving and that occurred after August 31, 2010, provide a statement indicating where the earth was moved to or how it was disposed of.	B. Review list of construction activities and means for disposing of earth.	N/A	1	N/A. Ponds established in 16.11.2007	1			
		c. During local community interviews, verify there is no evidence that the farm has discharged earth into common water bodies.	C. During local community interviews, verify there is no evidence that the farm has discharged earth into common water bodies.	According to the local community interview, the farm had its own area to store all the sludge and the sludges could not be discharged into common water bodies. However, Tan Thuan Dong farm feels that this community observation may be a misunderstanding: These ponds and gardens are close to the farm so the farm managers comment that stakeholders may think that area belong to their farm. The farm managers confirm that Tan Thuan Dong farm has no area for storing the sludge and all sludge will be discharged into the ponds of local people and they use the sludge as fertilizer for mango and chili gardens.	1	N/A. Ponds established in 16.11.2007	1			
Footnote	[8] For ponds established after the publication of the PAD standards.									
Footnote	[9] Exception made for discharge into water bodies belonging to the farm and without negative impacts to other water resource users.									
2.2.4	<p><b>Indicator:</b> Evidence [10] of no negative impacts on endangered species [11]</p> <p><b>Requirement:</b> Yes</p> <p><b>Applicability:</b> All</p>	a. Do a search of published and grey (e.g. local newspapers, magazines) literature to identify endangered species that occur in the area.	A. Review search results for adequacy and completeness.	Rezerd (consultant agency) did the survey based on the VN Red List and IUCN. The results are adequate and complete.	1	Search result was available and completed. REZERD did the survey in 5.12.2012. There are 9 fishes, 3 birds, 13 mammals (Vietnam Regulations), 2 fishes, 2 birds, 3 mammals (IUCN), 3 birds (CITES) in Tan Thuan Dong farm.	1			
		b. Determine whether any species occurring in the area are listed as endangered by relevant national authorities.	B. Review the source and accuracy of the list.	There are 9 fishes and 7 birds, 13 reptiles in the Vietnam Red list. The source was reviewed and was accurate.	1	The source and accuracy of list were reviewed.	1			
		c. Prepare a list of all endangered species occurring in the area by combining results from 2.2.4(a) and 2.2.4(b) with results from the IUCN database search (see 6.6.2).	C. Review list for completeness. Compare with results from search of IUCN database for red list species (see 6.6.2).	Search result is available as well as a written procedure comparing with IUCN, CITES and Vietnam regulation. There are a number of endangered species listed but these have never been seen on or around the farm.	1					
		d. Prepare written procedures describing how the farm avoids negative impacts to endangered species that may occur on the farm.	D. Review procedures for adequacy.	Procedure No. QT28 issued in 14.12.2011 indicates how to deal with endangered species when seeing in the farm.	1					
		e. During local community interviews, verify there is no evidence that the farm is presently having a negative impact on endangered species the farm has recently had a negative impact (since August 2010).	E. During local community interviews, verify there is no evidence that the farm is presently having a negative impact on endangered species the farm has recently had a negative impact (since August 2010).	N/A. According to the government representatives, there was no endangered species in this area. The government representative also said they would inform both the farm and local community if there's endangered species in the future.	1	No evidence of negative impact on endangered species, both presently and recently, from the farm	1			
Footnote	[10] Farmers shall submit the result of a search of published and grey (e.g. local newspapers, magazines) literature. Statements from local communities and organizations shall also be produced.									
Footnote	[11] As set by IUCN and national authorities.									
2.3 Criteria: Site connectivity										
Compliance Criteria (Required Client Actions):					Auditor Evaluation (Required CB Actions):					
2.3.1	<p><b>Indicator:</b> Farm does not impede navigation, aquatic animals or water movement</p> <p><b>Requirement:</b> Yes</p> <p><b>Applicability:</b> Pens and Cages</p>	a. Obtain community testimonials or similar evidence to show the farm does not impede navigation, aquatic animals or water movement.	A. Inspect site to verify that pens, cages and/or associated farm structures do not impede navigation, aquatic animals or water movement.	N/A. Ponds	1	N/A. Pond	1			
		b. During local community interviews, verify there is no evidence that the farm impedes navigation, aquatic animals or water movement.	B. During local community interviews, verify there is no evidence that the farm impedes navigation, aquatic animals or water movement.	N/A. The farm was located inland of Vietnam, so they won't have any negative impacts on navigation, aquatic animals or water movement.	1	N/A. Pond	1			
2.3.2	<p><b>Indicator:</b> Minimum width of the water body [15] without cages (see Diagram 1, Annex C)</p> <p><b>Requirement:</b> ≥ 50%</p> <p><b>Applicability:</b> Cages</p>	a. Provide a map or diagram showing measurements of cages and width of the water body.	A. Cross-check the current farm map or diagram using Google Map, satellite images or similar means (if detailed information is available). If current farm layout differs from the most recent available image, verify that the map or diagram reflects the actual farm layout.	N/A. Ponds	1	N/A. Pond	1			
		b. Provide measurements and calculations sufficient to show compliance (see Diagram 1 from Annex C of the ASC Pangasius Standard)	B. Verify that calculations are accurate and confirm compliance.	N/A. Ponds	1	N/A. Pond	1			
Footnote	[15] Water body: Any pond, lake, canal, river, stream or any other distinct mass of water, whether publicly or privately owned, including the banks and shores thereof.									

2.3.3	<b>Indicator:</b> Maximum width a farm can occupy calculated when the water body level/width is at its minimum (see Diagram 2, Annex C) <b>Requirement:</b> ≤ 20% percent of the width of the water body <b>Applicability:</b> Pens	a. Provide a map or diagram showing measurements of pens and width of the water body.	A. Cross-check the accuracy of the farm map or diagram using Google Map, satellite images or similar means (if detailed information is available).	NA. Ponds					N/A. Pond	1	
		b. Provide measurements and calculations sufficient to show compliance (see Diagram 2 from Annex C of the ASC Pangasius Standard)	B. Verify that calculations are accurate and confirm compliance.	NA. Ponds					N/A. Pond	1	
		.	C. Inspect site to verify that farm diagrams accurately show the size and position of pens within the water body.	NA. Ponds					N/A. Pond	1	
2.3.4	<b>Indicator:</b> Maximum number of contiguous pens allowed (see Diagram 3, Annex C) <b>Requirement:</b> Two, only if a stretch of river bank that is at least the length of the two pens is left free from farms on both sides of the pens <b>Applicability:</b> Pens	a. Provide a map or diagram showing the size and number of pens, and showing the shoreline distance between pens.	A. Inspect site to verify the farm's diagrams accurately show the size and position of pens, and the shoreline distance between pens.	NA. Ponds					N/A. Pond	1	
		b. On the map, show how the arrangement of pens complies with the requirement for number and separation distance (see Diagram 3, Annex C)	B. Verify the farm's arrangement of pens is in compliance.	NA. Ponds						N/A. Pond	1

**2.4 Criteria: Water use**

Compliance Criteria (Required Client Actions):		Auditor Evaluation (Required CB Actions):									
2.4.1	<b>Indicator:</b> Farm complies with water allocation [16] limits as set by local authorities or a reputable independent institution [17] <b>Requirement:</b> Yes <b>Applicability:</b> Ponds	a. Maintain records of water intake. For first audits, records must cover at least 1 full crop per site (see preamble).	A. Verify the farm keeps complete records of water intake.	Record of water intake was verified. Water intake was calculated from the pond preparation to before harvest.	1				Checked the water intake. Ex: Pond 13: 306240m3	1	
		b. Obtain a statement from local authorities indicating the water allocation limits (units given) for the farm. If local authorities do not set water allocation limits for farms operating in the region, obtain a statement from local authorities attesting to this fact.	B. Review the water allocation limits set for the farm by local authorities. If local authorities do not set water allocation limits, confirm the farm has an attestation.	The application for water allocation has been submitted in 30.11.2012 to Environmental Resource Department Dong Thap. The water allocation limits has not yet been issued.	1				Water use permit No. 1256/GP-UBND was issued Dong Thap People Committee in 28.12.2012 allowed to use 25431m3/day and night.	1	
		c. If water allocation limits are not set by local authorities (see 2.4.1b), obtain a statement from a reputable independent institution (see Footnote 17) indicating the water allocation limits (units given) for the farm.	C. Review evidence that water allocation limits have been set for the farm by a reputable independent institution (as applicable).	NA	1				Issued Dong Thap People Committee in 28.12.2012, provincial government	1	
		d. Demonstrate the reputability of the authority/institution identified in 2.4.1(b) by providing peer reviewed articles and/or reports on water allocation (if applicable).	D. Review evidence for reputability of the authority/institution responsible for water allocation (as applicable).	NA	1				See 2.4.1C	1	
		e. Calculate the farm's water intake on a crop-by-crop basis to show compliance with water allocation limits.	E. Check the farm's water intake against the water allocation limits. Verify compliance with limits set by local authority. Cross-check against reported values for total water abstracted (see 2.4.2).	Permit to use water has not been issued by government. Therefore, the comparison between farm's water intake against the water allocation limits could not be done.	1				DK. Random check in the Record of water intake and out: 7.5.2013 = 14952m3 (from 8 ponds). The maximum water intake was 14957m3 in 9.2.2013. Compliant.	1	

[16] Valid for both surface water and groundwater. Surface water is defined as "water collecting on the ground or in a stream, river, lake, wetland or ocean." Groundwater is defined as "water beneath the earth's surface that supplies wells and springs." Note the term "surface water" is used here in place of the original term "surficial water" that appeared in the Pangasius Aquaculture Dialogue Standards.

[17] A reputable independent institution can be a government organization, an academic institution or an organization that is not linked specifically to the aquaculture sector, but has generated water use parameters for the region, or is responsible for water allocation. Reputability of the institution shall be demonstrated by the farmer showing peer reviewed articles and/or reports on water allocation. Documents produced for a sector other than aquaculture are also acceptable. A track record of at least three years of operation must be available.

2.4.2	<b>Instruction to Clients for Indicator 2.4.2 - Calculating the Ratio of Total Water Abstracted per Ton of Fish Produced</b> Annex D of the ASC Pangasius Standard provides a formula for calculating "Q" which is the ratio of total water abstracted per ton of fish produced. Farms must perform these calculations using harvest data from individual ponds (i.e. it is done on a crop-by-crop basis) and then using those results to determine a farm-wide average across all ponds. Calculations can be done as described here. For the first pond: - compute the total volume of water abstracted ("TEV") in cubic meters (m <sup>3</sup> ) during the production cycle; - compute the total weight of fish produced ("A") in metric tons at harvest time; and - calculate Q for the first pond using the equation: Q = TEV / A Repeat the calculations for the second pond, third pond... etc. until Q has been determined for each pond that was harvested. Use the Q values from each pond (Q <sub>1</sub> , Q <sub>2</sub> , Q <sub>3</sub> ... Q <sub>n</sub> ) to compute the farm-wide average, or Q <sub>avg</sub>	a. Using records of water intake (see 2.4.1a), calculate total water abstracted (m3) for each pond harvested by the farm. For first audits, records must cover at least 1 full crop per site (see preamble).	A. Review calculations against intake records to confirm accuracy.	Calculation against intake records was reviewed. Accuracy.	1				Record of water intake is available for all ponds.	1	
		b. Maintain records showing amount of fish harvested from each pond.	B. Verify the farm keeps records showing the amount of fish harvested.	Fish harvested record were verified.	1				Receipts showing the amount of fish harvested are the transport receipts to the processing plants. They were checked in 11 harvested ponds since 12. 2012.	1	
		c. Calculate the total weight of fish produced (in metric tons) from each pond.	C. Review calculations against sales records and estimates of current stock biomass to confirm accuracy. If needed, reconcile the totals with the weight of any fish that were harvested but not sold (i.e. crops lost after a disease outbreak).	Calculations against sale records were reviewed. Here was Delivery sheet to the processing plant).	1				There are 11 ponds harvested since 12.2012. The calculation is done in every farm diary after harvesting and signed by farm manager.	1	
		d. For each pond, calculate the ratio of total water abstracted per ton of fish produced (see above Instructions and Annex D of the ASC Pangasius Standard as an example).	D. Review farm's calculations for accuracy. Cross-check that water volumes (2.4.2a) and harvest weights (2.4.2b) from individual ponds can be reconciled with total annual production (2.4.2c) and total annual water intake (2.4.1e).	Farm's calculation were reviewed and accurately. First inspection.	1				OK. The calculation is done in every farm diary after harvesting and signed by farm manager. A cross-check is possible with all the required data.	1	
		e. Using results from all harvested ponds, calculate the farm-wide average ratio of total water abstracted per ton of fish produced (see Instructions above).	E. Confirm the farm-wide average Q is ≤ 5,000m <sup>3</sup> /metric ton of fish produced.	First inspection. The farm-wide average Q is < 5000m <sup>3</sup> /metric ton of fish produced.	1				the farm-wide average was from 167.59m <sup>3</sup> /metric ton of fish produced to 471.24m <sup>3</sup> /metric ton of fish produced. The average is 304.06m <sup>3</sup> /metric ton. Compliance	1	
		Footnote	[18] Water abstracted is water removed from the water body and introduced into the farm. It includes both surficial water and groundwater.								

**PRINCIPLE 3. MINIMIZE THE NEGATIVE IMPACT OF PANGASIOUS FARMING ON WATER AND LAND RESOURCES**

**3.1 Criteria: Nutrient utilization efficiency**

Compliance Criteria (Required Client Actions):		Auditor Evaluation (Required CB Actions):									
--	--	---	--	--	--	--	--	--	--	--	--

3.1.1	<p><b>Indicator:</b> Maximum amount of total phosphorus (TP) [19] added as feed per metric ton of fish produced.</p> <p><b>Requirement:</b> 20 kg/t</p> <p><b>Applicability:</b> Pens and Cages</p>	<p><b>Instruction to Clients for Indicators 3.1.1 and 3.1.2 - Laboratory Analysis of TP and TN in Feed</b></p> <p>In order to demonstrate compliance with indicator 3.1.1 and 3.1.2, farms must be able to establish the amount of total phosphorus (TP) and total nitrogen (TN) in feeds. Farms shall obtain from each of their feed suppliers a declaration stating the maximum TP and TN content. Farms shall then verify supplier declarations by testing a representative number of batches (e.g. 1 sample for every 1,000 tonnes of a feed used) for TP and TN content. Tests shall be performed by a fully independent laboratory that is accredited to perform these analyses in accordance with ISO 17025. Results should show that declarations made by the feed supplier are accurate and that the feed is within the limits stated in the declaration. Farms must demonstrate compliance for all feeds used in the crops that are included in the calculation, regardless of whether those feeds were farm-made or commercially sourced. All calculations should be made on a crop-by-crop basis.</p> <p><b>Note 1:</b> For first audits, farms are not required to check the TP and TN content of feeds using an independent laboratory.</p> <p><b>Note 2:</b> Feed refers to all feeds or feed items, regardless of where or how they are produced, and applies to all farms seeking certification.</p>																					
		<p>a. Maintain records showing the type of feed and the amount used. This requirement applies to all feed used in the crops that are included in the calculation. For first audits, records must cover at least 1 full crop per site (see preamble).</p>	<p>A. Confirm the farm has complete and accurate records for feed used.</p>	NA_Ponds																			1
		<p>b. Obtain relevant declarations of TP content from feed suppliers for all feed used in the crops included in the calculation. For first audits, records must cover at least 1 full crop per site (see preamble).</p>	<p>B. Verify the farm has obtained declarations for TP content in feed.</p>	NA_Ponds																			1
		<p>c. Provide evidence that the farm tested TP from a representative sample of feeds (see instructions) to verify that declarations from the feed supplier are accurate and that the feed is within limits stated in declarations (as applicable).</p>	<p>C. Review evidence to confirm that farm checks whether TP content is reported accurately by feed suppliers (if applicable).</p>	NA_Ponds																			1
		<p>d. Use results of 3.1.1a and 3.1.1b to calculate the amount of TP in kilograms (kg) added to each enclosure. For first audits, records must cover at least 1 full crop per site (see preamble).</p>	<p>D. Review farm's calculations. Cross-check purchase records against the feed quantities reported by the farm.</p>	NA_Ponds																			1
	<p>e. Using total weight of fish produced (answer from 2.4.2c), calculate the amount of TP added as feed per metric ton of fish produced. For first audits, records must cover at least 1 full crop per site (see preamble).</p>	<p>E. Review farm's calculations to confirm the farm complies with the Requirement.</p>	NA_Ponds																			1	
<p><b>Footnote</b> [19] TP includes all forms of phosphorus found in the sample (Adapted from Australian Government, Department of Meteorology).</p>																							
3.1.2	<p><b>Indicator:</b> Maximum amount of total nitrogen (TN) [20] added as feed [21] per metric ton of fish produced.</p> <p><b>Requirement:</b> 70 kg/t</p> <p><b>Applicability:</b> Pens and Cages</p>	<p><b>Note:</b> see instructions for Indicator 3.1.1</p>																					
		<p>a. Maintain records showing the type of feed and the amount used. This requirement applies to all feed used in the crops that are included in the calculation. For first audits, records must cover at least 1 full crop per site (see preamble).</p>	<p>A. Confirm the farm has complete and accurate records for feed used.</p>	NA_Ponds																		1	
		<p>b. Obtain relevant declarations of TN content from feed suppliers for all feed used in the crops included in the calculation. For first audits, records must cover at least 1 full crop per site (see preamble).</p>	<p>B. Verify the farm has obtained declarations for TN content in feed.</p>	NA_Ponds																			1
		<p>c. Provide evidence that the farm tested TN from a representative sample of feeds (see instructions) to verify that declarations from the feed supplier are accurate and that the feed is within limits stated in declarations (as applicable).</p>	<p>C. Review evidence to confirm that farm checks whether TN content is reported accurately by feed suppliers (if applicable).</p>	NA_Ponds																			1
		<p>d. Use results of 3.1.2a and 3.1.2b to calculate the amount of TN in kilograms (kg) added to each enclosure. For first audits, records must cover at least 1 full crop per site (see preamble).</p>	<p>D. Review farm's calculations. Cross-check purchase records against the feed quantities reported by the farm.</p>	NA_Ponds																			1
	<p>e. Using total weight of fish produced (answer from 2.4.2c), calculate the amount of TP added as feed per metric ton of fish produced. For first audits, records must cover at least 1 full crop per site (see preamble).</p>	<p>E. Review farm's calculations to confirm the farm complies with the Requirement.</p>	NA_Ponds																			1	
<p><b>Footnote</b> [20] TN means the measure of all forms of nitrogen found in the sample, including nitrate, nitrite, ammonia N and organic forms of nitrogen (Australian Government, Department of Meteorology).</p>																							
<p><b>Footnote</b> [21] Feed refers to all feeds or feed items, regardless of where or how they are produced, and applies to all farms seeking certification. Farms that meet the requirements should be able to demonstrate compliance, regardless of whether their feed is made by a commercial feed mill or on site. See Principle 5 for further details.</p>																							
3.1.3	<p><b>Indicator:</b> Amount of TP discharged per metric ton of fish produced (See TP measurement methodology and calculation in Annex D)</p> <p><b>Requirement:</b> 7.2 kg/t</p> <p><b>Applicability:</b> Ponds</p>	<p><b>Instruction to Clients for Indicator 3.1.3 and 3.1.4 - Sampling and Laboratory Analysis of TP and TN Discharged</b></p> <p>Determination of the concentration of total phosphorus (TP) in water samples shall be made using the method: Kejdahl and Indo-phenol Blue. Determination of the concentration of total nitrogen (TN) in water samples shall be made using the method: Kejdahl and Ascorbic acid. Determinations will be made by a fully independent laboratory that is accredited to perform these analyses in accordance with ISO 17025.</p> <p>Farms will measure the amount of TP and TN discharged from a minimum of 1 pond in production; at least one of these ponds shall be randomly selected. The farm must record the number and identity of selected ponds before sampling. Required procedures for collecting water samples are as follows:</p> <ul style="list-style-type: none"> <li>- two water samples are taken: one from the pond (pond water) and one from the intake (intake water). The two samples are taken on the same day.</li> <li>- all water sample collections are done following the methodology provided by a fully independent ISO 17025 accredited laboratory and will be available to the certifier at the day of the audit. The accredited laboratory will be required to verify that sampling was conducted in accordance with this methodology.</li> <li>- all water samples are collected in second half of crop production (i.e. &gt; 90 days after stocking)</li> <li>- pond water samples are collected at 50% of pond depth</li> <li>- all water samples are collected before 11:00am</li> <li>- pond water samples are collected &gt; 6 hours after the intake of water into the pond</li> </ul> <p>For first audits farm records for monitoring TP and TN discharged must cover &gt;= 6 months.</p> <p>To prepare for first audit:</p> <ul style="list-style-type: none"> <li>- farm invites accredited laboratory to the farm to have the water sampled</li> <li>- if samples are out of compliance, farm takes corrective actions prior to ASC audit</li> </ul> <p>In case of non-compliances, farm does have the water sampled by accredited laboratory after implementation of corrective actions to show compliance</p> <p>all sampling results are supplied to auditor by the accredited laboratory to show that corrective action has been taken and that farms is now in compliance with the ASC Standard</p>																					
		<p>a. Specify the name and relevant qualifications/accreditations of the independent laboratory that is used to perform water quality monitoring and a copy of the contract specifying that water sampling and analyses are to be conducted in line with instructions for 3.1.3</p>	<p>A. Confirm the laboratory is suitably qualified and briefed to conduct water sampling and analyses.</p>	The Central monitoring technical resources and environment Dong Thap (ISO 17025 certified) did the TP test. The sample was taken according to ASC Sampling taken Procedure ASC-PLD3/QT06. Confirm compliance.																			
<p>The external Lab named Technology, Natural Resources and Environment Monitoring Centre - Dong Thap - ISO 17025 certified took the samples and analyzed. Minutes of water samples taken were compliant to Instruction for 3.1.3. Example: Check the TP, TN results, minutes in the pond 13 (harvested in 16</p>																							

		b. Obtain laboratory results for TP concentration in pond water samples and intake water samples.	B. Review laboratory results for TP concentration.	Lab result for TP was reviewed. Result: TP in intake water: 0.97; TP in the pond: 1.05	1			lab results were reviewed.	1		
		c. For each pond, identify the total weight of fish produced (result from 2.4.2b), and the total volume of water discharged (answer from 2.4.1) during the crop production cycle.	C. Review accuracy of farm's data.	First inspection. One pond selected. Farm's data was accurate. Ex: Pond 4: water discharged 167935m3	1			Data were reviewed and was accurate.	1		
		d. Enter the values from b and c (above) into the Total TP Discharge Formula (Annex D of the ASC Pangasius Standard) to calculate amount of TP discharged per metric ton of fish produced per pond. Repeat for each pond that was sampled.	D. Review farm's calculations to confirm accuracy.	Calculations were reviewed. Accuracy.	1			Calculations were reviewed and are accurate. Example: checked data in pond 13 (TP=0.0625), pond 9 (TP=0.0255).	1		
		e. Use the TP values (answer d) from different ponds to calculate the farm-wide average amount of TP discharged per metric ton of fish produced.	E. Review farm's calculations of average TP to confirm compliance with the Requirement.	Farm's calculation of average TP was review. Compliance. TP=0.04kg/ton.	1			Calculations were reviewed. TP value was from 0.0205 to 0.0625. Average TP is 0.03 kg/t. Compliance.	1		
		<b>Note:</b> see instructions for indicator 3.1.3									
3.1.4	Indicator: Amount of TN discharged per metric ton of fish produced (See TN measurement methodology and calculation in Annex D) Requirement: 27.5 kg/t Applicability: Ponds	a. Specify the name and relevant qualifications/accreditations of the independent laboratory that is used to perform water quality monitoring.	A. Confirm the laboratory is suitably qualified to conduct water sampling and analyses.	ASC (Pangasius certified) did the TN test. The sample was taken according to ASC Sampling taken Procedure ASC-PL03/OT06. Confirm compliance.	1			See 3.1.3	1		
		b. Obtain laboratory results for TN concentration in pond water samples and intake water samples.	B. Review laboratory results for TP concentration.	Result: TN in intake water: 1.416; TP in the pond: 1.524	1			lab results were reviewed.	1		
		c. For each pond, identify the total weight of fish produced (answer from 2.4.2c), and the total volume of water discharged (answer from 2.4.1) during the crop production cycle.	C. Review accuracy of farm's data.	First inspection. One pond selected. Farm's data was accurate. Ex: Pond 4: water discharged 167935m3	1			Data were reviewed and is accurate.	1		
		d. Enter the values from b and c (above) into the Total TN discharge Formula (Annex D of the ASC Pangasius Standard) to calculate amount of TN discharged per metric ton of fish produced per pond. Repeat for each pond that was sampled.	D. Review farm's calculations to confirm accuracy.	Calculations were reviewed. Accuracy.	1			Calculations were reviewed and are accurate. Example: checked data in pond 13 (TN=0.0817), pond 9 (TN=0.0425).	1		
		e. Use the TN values (answer d) from different ponds and to calculate the farm-wide average amount of TP discharged per metric ton of fish produced.	E. Review farm's calculations of average TN to confirm compliance with the Requirement.	Farm's calculation of average TN was review. Compliance. TP=0.05kg/ton.	1			Calculations were reviewed and are compliant. TN values was from 0.0325 to 0.2616. Average TN is 0.08. Compliant.	1		
<b>3.2 Criteria: Measuring water quality in receiving water body</b>											
<b>Compliance Criteria (Required Client Actions):</b>			<b>Auditor Evaluation (Required CB Actions):</b>								
3.2.1	Indicator: Percentage change in diurnal dissolved oxygen [22] (DO) of receiving waters [23] relative to DO at saturation for the water's specific salinity and temperature. An exception is made for ponds that discharge water with TN and TP lower than the TN and TP of the intake water respectively (see DO measurement methodology in Annex D) Requirement: <=65% Applicability: All	<p><b>Instruction to Clients for Indicator 3.2.1 - Measuring Percent Change in Diurnal Dissolved Oxygen</b></p> <p>Farms shall monitor the percent change in diurnal dissolved oxygen in receiving waters. Dissolved oxygen (DO) concentration is reported relative to DO at saturation for the water's specific salinity, temperature and altitude. DO is measured using a hand-held oxygen meter or a more accurate (chemical) method, with accuracy established in peer-reviewed documents. The location of measurements should be the first natural receiving water body and as close as practical to the point of discharge but at a distance not exceeding 200m from the point of discharge. In addition, the following procedures are followed:</p> <ul style="list-style-type: none"> <li>DO monitoring is conducted fortnightly (i.e. once every two weeks)</li> <li>On each sampling day, two DO measurements are taken: at 1 hour before sunrise and at 2 hours before sunset (+/- 30 min).</li> <li>DO measurements are taken at 0.3 meters below the water surface.</li> <li>Temperature and salinity is recorded at the same time that DO is measured.</li> </ul> <p><b>Note 1:</b> An exemption to Indicator 3.2.1 is made for farms that have "cleaner" water (i.e. where the value of the farm TP and TN is lower than that of the intake water. This applies regardless of whether the receiving water is eutrophic. See indicators 3.3.1 and 3.3.2 for more information about measuring differences in TN and TP between pond inlet and outlet.</p>									
		a. Provide DO measurements .	A. Review dataset to confirm that monitoring covers the required timeframe.	Max DO in the morning: 4.9 (November and December 2012) Min DO in the morning: 3.5 (January 2012) Max DO in the evening: 6.6 (July 2012)	1			Verification in Dec 2012: DO for this audit were taken from Dec 2012. Max DO in the morning was 7 in 14.10.2013 Min DO in the morning was 4.7 in 10.12.2012	1		
		b. Calibrate all equipment at the frequency and by the method recommended by the manufacturer. Temperature, salinity and altitude are to be adjusted for in calibration or calculations.	B. Verify the farm technicians calibrate equipment as required.	Calibration is done one per three months by Vinh Hoan lab. Everytime measurement, DO equipment has to be calibrated.	1			equipment is calibrated as required. The equipment is calibrated manually prior to each use and by the lab every 3 months.	1		
		c. Calculate percent change in DDO for each monitoring date using the equation in Annex D.	C. Review calculations to confirm accuracy.	Calculations were reviewed. Accuracy	1			calculations were reviewed and are accurate.	1		
		d. Use results of 3.2.1c to calculate the average percent change in DDO over the entire 12-month monitoring period. For first audits, farm records must cover >= 6 months.	D. Confirm the average percent change in DDO is <= 65%.	The average percent change in DDO is from 11.29% to 29.94%. Compliance.	1			calculations were reviewed and are compliant. Max %DDDO was 27.4 in 10.12.2012 Min %DDDO was 6.19 in 22.7.2013 Average %DDDO was 15.16%. Compliant.	1		
		e. Arrange to take DO measurements while the auditor is at the farm.	E. Witness the farm measuring DO to confirm compliance with procedures. On-site values should fall within range of farm data for DDO. If an out of range measurement is observed, raise a non-conformity.	Witness the farm taken DO in the morning and in the afternoon: DO measurement was taken at 0.3 meters. Calibration was done before every measurement. - DO in the morning was higher than the DO max in the Nov and Dec 2012 . On-site DDOs of auditor and the farm were within the farm range	1			Witness the farm taken DO in the morning and in the afternoon: Farm value: morning - 6.7 (27.3noC), afternoon - 6.7 (26.7noC) Auditor value: morning - 6.8 (27.7noC), afternoon - 6.8 (26.8noC) DDDO of farm is 0.85% and DDDO of auditor 0.65%. The values was out of range measurement. Not compliant.			
Footnote	[22] DO is the concentration of oxygen dissolved in water, expressed in mg/l or as percent saturation, where saturation is the maximum amount of oxygen that can theoretically be dissolved in water at a given altitude and temperature (biology-online.org).										
Footnote	[23] "Receiving water" is the first natural water body that receives the water from the farm and does not belong to the farm.										
<b>3.3 Criteria: Measuring quality of pond effluents Water quality of pond effluents [24]</b>											
<b>Compliance Criteria (Required Client Actions):</b>			<b>Auditor Evaluation (Required CB Actions):</b>								
Footnote	[24] This criteria is not pertinent to either cage or pen cultures.										

3.3.1	<p><b>Indicator:</b> Maximum average percentage change of TP between inlet and outlet (See TP measurement methodology and TP discharge formula in Annex D).</p> <p><b>Requirement:</b> 100%</p> <p><b>Applicability:</b> Ponds</p>	<p><b>Instruction to Clients on Indicators 3.3.1 and 3.3.2 - Measuring Change in TP and TN Between Inlet and Outlet</b></p> <p>Determination of the concentration of total phosphorus (TP) in water samples shall be made using the method: Kejdahl and Indo-phenol Blue. Determination of the concentration of total nitrogen (TN) in water samples shall be made using the method: Kjeldahl and Ascorbic acid. Determinations will be made by a fully independent laboratory that is accredited to perform these analyses in accordance with ISO 17025. Laboratory results will be accompanied by a statement that indicates compliance to the methodology set in the ASC Pangasius Standard and This Audit Manual.</p> <p>Farms will measure the change in TP and TN from only a subset of the total number of ponds in production: 15% of all ponds (value rounded up to the nearest whole number). At least one of these ponds shall be randomly selected. The farm must record the number and selection of ponds before sampling. Required procedures for collecting water samples are as follows:</p> <ul style="list-style-type: none"> <li>- samples are collected by staff from the fully independent accredited laboratory;</li> <li>- samples are taken from the 'inlet' and the 'outlet' (inlet = the water in the intake canal, as close as possible to the farm being certified. Outlet = the actual water being discharged, not the receiving water. For farms using a water treatment system this could be the water in the final part of the treatment system before being discharged);</li> <li>- samples are collected from pond inlets and outlets during the second half of crop production (i.e. &gt; 90 days after stocking);</li> <li>- on each sampling day, at least two samples are collected from the outlet and these are taken at least 1 hour apart (use the average value in calculations below) and at a minimum the farm must sample from one pond per year.</li> </ul> <p>Percent Change in TP = (Outlet TP Conc. - Inlet TP Conc.) / Inlet TP Conc. x 100</p> <p>Percent Change in TN = (Outlet TN Conc. - Inlet TN Conc.) / Inlet TN Conc. x 100</p> <p>When more than one pond is sampled, determine a "farm-wide average" by calculating the average percent change for all sampled ponds.</p> <p>For first audits, farm records for monitoring percent change in TP and TN must cover &gt; 6 months.</p>	<p>a. Provide laboratory results for TP in water samples from inlet and outlet.</p> <p>b. For each pond, calculate the percent change of TP between inlet and outlet on each sampling day using the equation shown above.</p> <p>c. Use results of 3.3.1(b) to calculate the average percent change in TP over the entire monitoring period.</p> <p>d. Provide evidence of the on-site visit for the sampling of pond effluents for TP and TN by staff from the accredited laboratory.</p>	<p>A. Review laboratory results for TP.</p> <p>B. Review calculations to verify accuracy.</p> <p>C. Confirm the average percent change in TP is ≤ 100%. If any single value falls outside limits, raise a non-conformity.</p> <p>D. Review visit evidence for sampling for TP and TN to confirm compliance with procedures.</p>	<p>Lab result of TP was reviewed. Ex: TP inlet=0.97, TP outlet: 0.99 (0.98 and 1)</p> <p>Calculation was reviewed. Accuracy.</p> <p>First inspection. One pond was selected. Ex: 2.06%. Compliance</p> <p>Reviewed visit evidence. Confirm compliance.</p>	<p>Lab result checked. Example: check the result for TP done in discharged water in 23.01.2013 and intake water at pond 13 in 23.11.2013.</p> <p>Check the calculation. Accuracy TP of pond 13 = 11.96%</p> <p>Check the calculation. Average percent change in TP was 7.45%</p> <p>OK</p>	<p>1</p> <p>1</p> <p>1</p> <p>1</p>
3.3.2	<p><b>Indicator:</b> Maximum average percentage change of TN between inlet [25] and outlet [26] (See TN measurement methodology and TN discharge formula in Annex D).</p> <p><b>Requirement:</b> 70%</p> <p><b>Applicability:</b> Ponds</p>	<p><b>Note: see instructions for Indicator 3.3.1</b></p> <p>a. Provide laboratory results for TN in water samples from inlet and outlets.</p> <p>b. For each pond, calculate the percent change of TN between inlet and outlet on each sampling day using the equation shown above.</p> <p>c. Use results of 3.3.2(b) to calculate the average percent change in TN over the entire monitoring period.</p> <p>d. During the on-site visit, arrange for the auditor to observe sampling of pond effluents for TP and TN.</p>	<p>A. Review laboratory results for TN.</p> <p>B. Review calculations to verify accuracy.</p> <p>C. Confirm the average percent change in TN is ≤ 70%. If any single value falls outside limits, raise a non-conformity.</p> <p>D. Witness sampling for TP and TN to confirm compliance with procedures.</p>	<p>Lab result of TN was reviewed. Ex: TN inlet=1.416, TN outlet: 1.5015 (1.447 and 1.556)</p> <p>Calculation was reviewed. Accuracy.</p> <p>First inspection. One pond was selected. Ex: 6.04%. Compliance</p> <p>N/A. Inspection visit was not arranged at the same time of sampling</p>	<p>Lab result checked. Example: check the result for TN done in discharged water in 23.01.2013 and intake water at pond 13 in 23.11.2013.</p> <p>Check the calculation. Accuracy TP of pond 13 = 9.47%</p> <p>Check the calculation. Average percent change in TN was 13.21%</p> <p>N/A. Inspection visit was not arranged at the same time of sampling</p>	<p>1</p> <p>1</p> <p>1</p> <p>1</p>	
Footnote	[25] Inlet: The water in the intake canal, as close as possible to the farm or pond being certified.						
Footnote	[26] Outlet: The actual water being discharged, not the receiving water.						
3.3.3	<p><b>Indicator:</b> Minimum dissolved oxygen (DO) concentration in water discharged (See DO measurement methodology in Annex D)</p> <p><b>Requirement:</b> 3 mg/l</p> <p><b>Applicability:</b> Ponds</p>	<p><b>Instruction to Clients for Indicator 3.3.3 - Measuring DO in Water Discharged</b></p> <p>See Indicator 3.2.1 for a general description of the equipment and method used to measure dissolved oxygen (DO). Take DO measurements at the outlet where water is discharged (i.e. measure DO in the actual water being discharged, not in the receiving water. For farms using a water treatment system this could be the water in the final part of the treatment system before being discharged). Test DO at least once per week.</p> <p>a. Provide records of DO in water discharged to the natural environment. For first audits, farm records must cover ≥ 6 months</p> <p>b. Use data from all weekly measurements to calculate the average DO in water discharged over the entire monitoring period. For first audits, farm records must cover ≥ 3 months.</p> <p>c. During the on site visit, make arrangements for the auditor to observe calibration of equipment and measurements.</p>	<p>A. Review dataset to confirm that monitoring covers the required timeframe.</p> <p>B. Confirm DO in water discharged by farm is ≥ 3 mg/l. If any single value falls outside limits, raise a non-conformity.</p> <p>C. During the on-site visit, observe how the farm calibrates equipment and takes DO measurements (or takes samples for chemical analysis) to confirm compliance.</p>	<p>DO measurements covers more than 6 months (from Jan 2012). Compliance</p> <p>DO in water discharged was &gt;3mg/l. The min DO was 3.3 (August, September, October 2012), max DO is 4.6 (26.6.2012)</p> <p>Onsite visit. Compliance</p>	<p>Data is recorded prior to first certification in Dec 2012.</p> <p>OK. Measurement in two places, at the discharged place and when discharging. DO at discharging was from 3.5mg/l to 6.7mg/l. Compliant.</p> <p>Witness the farm staff calibrates and take DO measurement. The value was 8.6mg/l. Compliance.</p>	<p>1</p> <p>1</p> <p>1</p>	
3.4 Criteria: Sludge disposal for ponds and pens, not cages [27]							
		<b>Compliance Criteria (Required Client Actions):</b>	<b>Auditor Evaluation (Required CB Actions):</b>				
Footnote	[27] For cage culture, there are no requirements for benthic monitoring included, as cages account for a small percentage of production. This situation will be monitored and revised if the production of cage culture rises significantly.						
3.4.1	<p><b>Indicator:</b> Evidence that sludge is not discharged directly into receiving waters or natural ecosystems. [28]</p> <p><b>Requirement:</b> Yes</p> <p><b>Applicability:</b> All</p>	<p>a. Provide a detailed sludge management plan (also see 3.5.1). The plan will ensure that no sludge in any form is discharged directly into receiving waters or natural ecosystems.</p> <p>b. Maintain records of sludge disposal to show volume or weight and condition (i.e. fresh or dried) when disposed. For first audits, farm records must cover ≥ 3 months.</p> <p>c. If sludge is transferred (e.g. for agricultural use), obtain a declaration from the receiving party that specifies the sludge volume, delivery date, and expected use. The party shall declare that the sludge will not be discharged directly into receiving waters or natural ecosystems.</p> <p>d. If a sludge repository is used, provide a map showing its location within the farm or documents showing legal access to the repository (either ownership or a statement from the owner of right of use).</p>	<p>A. Review the farm's sludge management plan.</p> <p>B. Review records to confirm appropriate disposal according to plan.</p> <p>C. If yes to (c), confirm farm has appropriate documentary evidence.</p> <p>D. If yes to (d), inspect sludge repository during on-site visit.</p>	<p>Sludge management plan was reviewed. Sludge is taken twice a crop (pond preparation and during the grow out). The plan ensures that no sludge in any form is discharged directly into receiving waters or natural ecosystems. Sludge is given to the neighbors for agriculture.</p> <p>Record for each sludge delivery were reviewed. The volumes were mentioned. Compliance.</p> <p>Sludge is given for agriculture. The declaration from receiving party is done - no discharge directly into receiving waters or natural ecosystem.</p> <p>NA</p>	<p>Plan is available in 25.12.2010. Sludge is given to the local people for free or stored in the sludge pond. Sludge are taken twice each cycle, before harvesting and doing pond preparation. There is sludge pond with 5426.4 m<sup>2</sup> and 3m height.</p> <p>The farm regulates if the thickness of the sludge in the pond is 0.2m and in the sedimentation pond is 0.5m, the sludge will be taken.</p> <p>Total sludge volume from Dec 2012 to Nov 2013 was 48734m<sup>3</sup>. The 41409 m<sup>3</sup> of volume given to neighbor was among the total sludge volume. Record of giving sludge were checked and confirm compliance.</p> <p>Neighbor will apply for free sludge and the farm pays for sludge transportation. The 41409 m<sup>3</sup> of volume given to neighbor was among the total sludge volume. Record of giving sludge were checked and confirm compliance.</p> <p>Sludge repository was located in the farm with 5436.4m<sup>2</sup> area and 3 high (162.75.2m3) and have enough to storage the sludge. The min cubic meters of sludge repository as required by ASC was 7325m<sup>3</sup>.</p>	<p>1</p> <p>1</p> <p>1</p> <p>1</p>	

4.3 Criteria: Source of seed		Compliance Criteria (Required Client Actions):	Auditor Evaluation (Required CB Actions):							
4.3.1	<p><b>Indicator:</b> Allowance for use of wild-caught seed for grow out</p> <p><b>Requirement:</b> None</p> <p><b>Applicability:</b> All</p>	<p>a. Provide a declaration that the farm does not use wild-caught seed for grow out.</p> <p>b. Obtain statement from seed supplier(s) that the seed is not wild-caught (e.g. seed is derived from a broodstock held in captivity).</p> <p>c. Maintain seed receipts for all stocking events. For first audits, farm records must cover &gt; 6 months.</p>	<p>A. Verify declaration of no wild-caught seed for grow out.</p> <p>B. Verify that farm has statements from seed suppliers.</p> <p>C. Verify the farm maintains accurate records for sourcing of seed.</p>	<p>Declaration is available</p> <p>Seed supplier statements and receipts available.</p> <p>Recording of seed is within each farm diary and accurate.</p>	1	1	1	1	1	1
Footnote		[35] A thorough map of pangasius establishment that indicated the range of the species, as well as distinct stocks, will be necessary.								
Footnote		[36] Throughout these standards, the word "seed" is used for pangasius seed only.								
Footnote		[37] This standard is applicable to all farms using seed sourced from either populations which are indigenous or populations which are established before January 2005.								
4.4 Criteria: Genetically engineered and hybridized strains		Compliance Criteria (Required Client Actions):	Auditor Evaluation (Required CB Actions):							
4.4.1	<p><b>Indicator:</b> No use of genetically engineered (transgenic) or hybrid seed</p> <p><b>Requirement:</b> Yes</p> <p><b>Applicability:</b> All</p>	<p>a. Provide a declaration that the farm does not use genetically engineered (transgenic) or hybrid seed.</p> <p>b. Obtain statement from seed supplier that the seed is not genetically engineered (transgenic) or hybrid. For first audits, farm records must cover &gt; 6 months.</p>	<p>A. Verify declaration of no use of genetically engineered or hybrid strains.</p> <p>B. Verify that farm maintains statements from seed suppliers.</p>	<p>Declaration of no use of genetically engineered or hybrid strains was verified. Compliance</p> <p>Seed supplier statement was verified. Compliance</p>	1	1	1	1	1	1
Footnote		[31] A genetically modified organism (GMO) is an organism, with the exception of human beings, in which the genetic material has been altered in a way that does not occur naturally by mating and/or natural recombination [Directive 2001/18/EC].								
4.5 Criteria: Escapes.		Compliance Criteria (Required Client Actions):	Auditor Evaluation (Required CB Actions):							
4.5.1	<p><b>Indicator:</b> Evidence that inlets and outlets to culture systems and all confinements are equipped with net mesh or grills appropriately sized to retain the stocks in culture preventing fish of any size (in the holding unit being assessed) to escape</p> <p><b>Requirement:</b> Yes</p> <p><b>Applicability:</b> All</p>	<p>a. Provide farm records indicating fish sizes (e.g. average weight recorded monthly). For first audits, records must cover at least 1 full crop per site (see preamble).</p> <p>b. Maintain records indicating the size of net mesh or grills for the entire farm. For first audits, farm records must cover &gt; 6 months.</p>	<p>A. Review records for fish size in different holding units.</p> <p>B. Review records for mesh or grill size.</p> <p>C. During the on-site visit, inspect the size of net mesh or grills to confirm compliance.</p>	<p>Farm records for fish size were monthly reviewed in different holding units.</p> <p>Records for net were reviewed. The net size were changed from 1cm to 1.2, to 2 to comply with the fish size.</p> <p>On-site visit, the size of net is compliant.</p>	1	1	1	1	1	1
4.5.2	<p><b>Indicator:</b> Evidence of regular, timely inspections (at least once a day); mitigation and repairs are performed on net mesh or grills and recorded in a permanent register (available for inspection)</p> <p><b>Requirement:</b> Yes</p> <p><b>Applicability:</b> All</p>	<p>a. Provide farm records for daily inspection of net mesh or grills used in production (e.g. grow-out) units.</p> <p>b. Keep records of mitigation and repairs in a permanent register. For first audits, records must cover at least 1 full crop per site (see preamble).</p> <p>c. Arrange for the auditor to observe an inspection during the on-site visit.</p>	<p>A. Review records to verify inspections are regular and timely.</p> <p>B. Review the register to verify repairs are performed and recorded.</p> <p>C. Witness the farm performing an inspection of meshes and grills to confirm that the program is effective.</p>	<p>Daily inspections of nets were reviewed.</p> <p>Records of mitigation and repair were reviewed.</p> <p>Witness the farm performing an net inspection. Compliance.</p>	1	1	1	1	1	1
4.5.3	<p><b>Indicator:</b> Bund [38] height sufficient [39] to prevent water spillage, along with escapes, in the rainy season when flooding occurs</p> <p><b>Requirement:</b> Yes</p> <p><b>Applicability:</b> Ponds</p>	<p>a. Provide official records or statement showing local maximum water level (river levels, tide levels, flooding levels, etc) in the previous 10 years.</p> <p>b. Obtain a statement from local authorities or reputable organisation reporting the altitude (in above sea level) of the bund in its lowest point. Show location of bund low-point on a map of the farm (see 2.1.1).</p> <p>c. Provide a written statement that there were no incidents of significant spillage or escapement due to flooding in the last 12 months.</p>	<p>A. Review records covering &gt; 10 years or statement to establish the maximum height of high water when flooding occurs.</p> <p>B. Review statement and map. During the on-site visit, inspect farm to verify that bund height is sufficient to prevent spillage when flooding occurs. Note: dike, dike, bund and berm all have the same meaning for this criteria.</p> <p>C. During local community and employee interviews, verify there is no evidence for significant spillage or escapement from the farm in the last 12 months.</p>	<p>Dong Thap Hydrology Centre did the survey in 11.2012. Max is 278cm in 2011. Min is minus -101cm in 2005.</p> <p>Statement of Dong Thap Hydrology about the location of bund low-point : 318cm. This is higher than the flood max - 40cm.</p> <p>The farm protected the ponds well with solid net, there was no spillage at all.</p>	1	1	1	1	1	1
Footnote		[38] Bund: berm containing the water in the pond.								
Footnote		[39] Consider 10 years maximum water level (including cases of storms).								
4.5.4	<p><b>Indicator:</b> Presence of trapping devices [40] placed in effluent/drainage canals or on water outlets to capture escapes, a record of findings and actions taken (available for inspection)</p> <p><b>Requirement:</b> Yes</p> <p><b>Applicability:</b> All</p>	<p>a. Identify the quantity and location of all trapping devices. The term 'trapping device' does not include mesh or grid barriers (see 4.5.1).</p> <p>b. Maintain a record of regular (at least weekly) trap inspections and observed escapes.</p> <p>c. When escapes are detected, record any actions taken to reduce or eliminate escapement. For first audits, these records must cover at least 1 full crop per site (see preamble).</p>	<p>A. Review how the farm uses trapping devices to monitor escapes. Verify that trapping devices do not injure/compromise fish (e.g. gill nets).</p> <p>B. Review records of inspection and observed escapes.</p> <p>C. Review the suitability of any actions taken by the farm to reduce escapement.</p> <p>D. During the on-site visit, inspect to verify that traps are configured properly and located suitably to ensure effective farm-wide monitoring of escapes.</p>	<p>The trap is installed in the end of discharged water point. The trapping device is verified showing not injure fish.</p> <p>Trap is inspected for escapes around three days. Records were reviewed.</p> <p>No escapes so far. Actions taken is mentioned in case of escapee has not been done.</p> <p>On-site visit, the trap is configured properly and located suitably.</p>	1	1	1	1	1	1
Footnote		[40] These devices should not injure or compromise fish health (e.g., gill nets).								
4.6 Criteria: Pond Maintenance		Compliance Criteria (Required Client Actions):	Auditor Evaluation (Required CB Actions):							
		a. Prepare a procedure for the monitoring and repair of damaged bunds.	A. Review farm's procedure for bund monitoring and repair.	Farm's procedure for bund is reviewed. Weekly bund monitoring is recorded.	1	1	1	1	1	1

4.6.1	<b>Indicator:</b> Evidence that the bund has remained intact [41] throughout the culture cycle <b>Requirement:</b> Yes <b>Applicability:</b> All	<b>b.</b> Maintain a record of bund monitoring and repair that identifies date of damage detection and when the farm initiated and completed repairs.	<b>B.</b> Review records for evidence that the bund has remained intact in the last 12 months. If a bund was found to be compromised, there shall be evidence that repairs were completed as soon as practical.	Records for evidences that the bund has remained intact in the last 12 months were reviewed. There were on 26.5.2012, 2.6.2012. The repairs were completed and recorded. Compliance.	1		Check twice a week for the bund repair. OK	1	
		<b>c.</b> During the on-site visit, arrange for auditor to inspect farm's bunds.	<b>C.</b> Inspect bunds to confirm compliance. Examine for any signs of collapse and note evidence of repairs.	Onsite visit. No signs of collapse in the farm. However, bunds made by sand bag between the sedimentation pond and public canal had leakage.	1		OK	1	
		<b>d.</b> During local community and employee interviews, verify that bunds have remained intact throughout the culture cycle.	<b>D.</b> During local community and employee interviews, verify that bunds have remained intact throughout the culture cycle.	As per local community interviews, the bunds were all well maintained throughout the culture cycle.	1		Interview one worker. Compliance	1	
<b>Footnote:</b> [41] Has not been affected in such a way to allow the escape in part or all of the farmed stock.									
4.6.2	<b>Indicator:</b> Evidence assuring there has been no intentional release [42] <b>Requirement:</b> Yes <b>Applicability:</b> All	<b>a.</b> Prepare a declaration that the farm has made no intentional releases in the last 12 months.	<b>A.</b> Review declaration to confirm compliance.	Farm declaration was reviewed. Signed in 30.11.2012	1		Declaration is available	1	
		<b>b.</b> Maintain records and receipts to show that all crops stocked have been harvested and sold (see 2.4.2 and 5.2.1) or properly disposed (see 3.5.4). For first audits, records must cover at least 1 full crop per site (see preamble).	<b>B.</b> Review records to confirm that all stockings can be accounted for by harvest or disposal.	Records were reviewed. All stockings can be accounted for by harvest or disposal.	1		Check the farm diary about harvest and transport records to the processing plant. OK	1	
		<b>c.</b> Prepare a written justification for any periods of inactivity lasting longer than 3 months. For first audits, records must cover at least 1 full crop per site (see preamble).	<b>C.</b> Review annual production records to determine if there are significant discrepancies that could indicate the possibility of intentional release.	All stock accounted for in farm diary as harvest or morts. There have been no periods of inactivity for over 3 months. It is included in the procedure that no fish can be released intentionally.	1		All stock accounted for in farm diary as harvest or morts. There have been no periods of inactivity for over 3 months. It is included in the procedure that no fish can be released intentionally.	1	
<b>Footnote:</b> [42] The original intent of footnote 42 from the Pangasius Aquaculture Dialogue Standards has been clarified here for auditing purposes. It now reads: "Significant discrepancies between the number (or biomass) of fish stocked and the number (or biomass) of fish sold in the absence of disease outbreaks, major theft or escapes would indicate the possibility of intentional release."									
<b>PRINCIPLE 5. USE FEED AND FEEDING PRACTICES THAT ENSURE THAT FEED INPUTS ARE SUSTAINABLE AND MINIMIZED</b> <b>5.1 Criteria: Sustainability of feed ingredients</b>									
		<b>Compliance Criteria (Required Client Actions):</b>			<b>Auditor Evaluation (Required CB Actions):</b>				
5.1.1	<b>Indicator:</b> Use of uncooked or unprocessed fish and/or fish products [43] (including trash fish) as feed <b>Requirement:</b> No <b>Applicability:</b> All	<b>a.</b> Maintain records (e.g. receipts) for all purchases of commercial feed in the last 12 months. For first audits, farm records must cover ≥ 6 months.	<b>A.</b> Review farm records for commercially sourced feeds.	Farm records were reviewed.	1		N/A. No use uncooked and unprocessed fish or fish as feed in the farm. Only compound feed from Vinh Hoan is used	1	
		<b>b.</b> If any farm-made feed was used, provide a description of ingredients and preparations. Maintain evidence of purchase (e.g. receipts) or ownership of all ingredients. For first audits, farm records must cover ≥ 6 months.	<b>B.</b> Review ingredients to verify that farm-made feed had no uncooked or unprocessed fish and/or fish products (including trash fish).	N/A. No farm-made feed used.	1		N/A. No use uncooked and unprocessed fish or fish as feed in the farm. Only compound feed from Vinh Hoan is used	1	
		<b>c.</b> Verify that farm records are sufficient to account for all feed used. There should be no indication of unexplained sources of feed.	<b>C.</b> Verify that farm records are sufficient to account for all feed used. There should be no indication of unexplained sources of feed.	N/A. No farm-made feed used.	1		No use uncooked and unprocessed fish or fish as feed in the farm. Only compound feed from Vinh Hoan is used	1	
<b>Footnote:</b> [43] Fish products are defined as all forms of fish or products derived from fish (e.g., whole fresh, frozen, minced, dried, meals, oils, and processing by-products).									
5.1.2	<b>Indicator:</b> Use of pangasius fish processing by-products [44] as feed or feed ingredients <b>Requirement:</b> No <b>Applicability:</b> All	<b>a.</b> Prepare a declaration that no by-products of pangasius fish processing were used as feed for pangasius at any time during the last 12 months.	<b>A.</b> Review farm's declaration to confirm that no by-products of pangasius fish processing were used as feed for pangasius.	Farm's declaration was reviewed. No by-products of pangasius fish processing were used as feed for pangasius.	1		OK, only compound feed from Vinh Hoan is used, for which a declaration is available.	1	
		<b>b.</b> For all feed used in the last 12 months, obtain a declaration from the manufacturer showing compliance. For first audits, farm records must cover ≥ 6 months and all the feed requirements apply only to fish on site.	<b>B.</b> Review manufacturer's declaration to confirm no pangasius by-products were in feed.	Feed manufacturer's declaration was reviewed. No by-products of pangasius fish processing were used as feed for pangasius.	1		OK, only compound feed from Vinh Hoan is used, for which a declaration is available.	1	
		<b>c.</b> If farm-made feed was used in the last 12 months, prepare a declaration that no pangasius by-products were used as feed ingredients. If fish meal or fish oil was used, obtain a statement from the respective supplier confirming compliance. For first audits, farm records must cover ≥ 6 months.	<b>C.</b> Review farm documentation to confirm that no pangasius by-products were used in feed preparation (if applicable).	N/A. No farm-made feed used.	1		N/A. No farm-made feed used, only compound feed from Vinh Hoan is used.	1	
<b>Footnote:</b> [44] Trimmings, viscera, heads and frames from the processing of fish—either wild or farmed—are processing by-products. Generally, these are not counted as part of the "fish product" amount when calculating feed fish equivalencies, as this helps promote the best use of the wild-caught fish. However, it is not acceptable to use pangasius by-products in pangasius diets.									
5.1.3	<b>Indicator:</b> Fish products used in feed are not in the "threatened categories" [45] on the International Union for Conservation of Nature (IUCN) Red List of Threatened Species [46] <b>Requirement:</b> Yes <b>Applicability:</b> All	<b>Instructions to Clients for Indicator 5.1.3 - Confirm there are no IUCN Red List Species in Feed</b> For the purposes of this indicator, the ASC definition of "fish products" shall encompass all wild-capture marine resources, including finfish and invertebrate species (e.g. shrimp, crab, squid). Farms must be aware that feeds which contain any IUCN Red Listed species do not comply with the Standard. This restriction extends to feeds that use by-products (e.g. trimming) or aquacultured products of IUCN Red Listed species.  For each fish product used as a feed ingredient, determine whether the species is on the IUCN Red List as follows: - go to <a href="http://www.iucnredlist.org/">http://www.iucnredlist.org/</a> - in the primary search field enter the genus and species - click on "run search" and record the status of the species.							
		<b>a.</b> Obtain a statement from feed manufacturer identifying the origin of all fish products used as feed ingredients (to specify genus, species and region of harvest). For first audits, farm records must cover ≥ 6 months and all the feed requirements apply only to fish on site.	<b>A.</b> Confirm that farm has records of ingredients from all commercially sourced feeds.	Peruvian Anchovy used in fish meal - harvest region: Northern Border of EEZ. By-product of Atlantic salmon - Salmo salar from fish farm and fish processing factories ) used in the fish oil	1		product (from rice, wheat) Soybean meal Cassava Vegetable oil: soybean oil, rice bran oil Fish meal: 5% max, produced from the by-product from Tuna	1	
		<b>b.</b> Verify that none of the species identified in 5.1.3(a) are in "threatened categories" on the IUCN Red List of Threatened Species.	<b>B.</b> Repeat search of IUCN database to verify that farm obtained an accurate result.	Search of IUCN database was repeated. Peruvian Anchovy used in fish meal is not in IUCN	1		Repeat search of IUCN. The farm has accurate result.	1	
		<b>c.</b> If farm-made feed was used, verify that no species are in "threatened categories" on the IUCN Red List. If fish meal or fish oil were used, obtain a statement from the respective supplier confirming compliance.	<b>C.</b> Confirm that farm has provided sufficient evidence of compliance.	No farm-made feed used.	1		N/A. No farm-made feed used, only compound feed from Vinh Hoan is used.	1	
<b>Footnote:</b> [45] Vulnerable, Endangered and Critically Endangered.									
<b>Footnote:</b> [46] <a href="http://www.iucnredlist.org">www.iucnredlist.org</a> . Use latest version. A period of one year is allowed for adaptation to any new amendment, therefore if a new animal is added to the IUCN list, producers have one year to meet the standards.									
	<b>Indicator:</b> Fish products used in feed are not from species listed in the Convention on International Trade in Endangered Species (CITES) Appendices I, II, and III	<b>a.</b> Obtain a statement from feed manufacturer identifying the origin of all fish products used as feed ingredients (to specify genus, species and region of harvest). (See Indicator 5.1.5 about sourcing of trimmings and aquacultured products as feed ingredients). For first audits, farm records must cover ≥ 6 months and all the feed requirements apply only to fish on site.	<b>A.</b> Confirm that farm has a statement from the feed manufacturer verifying the origin of all fish products used as ingredients in all commercial feeds.	Statement from the feed manufacturer verifying the origin of all fish products used as ingredient was confirmed.	1		The fishmeal is sourced from byproducts of LN Merlucciusshabbi, LN Percophis brasiliensis, LN Microgogonogocarrallus, LN Cniscidon stratus and the oil is sourced from salmon oil (Salmon Salar) from aquaculture.	1	

6.1 Criteria: Mortalities												
		Compliance Criteria (Required Client Actions):		Auditor Evaluation (Required CB Actions):								
6.1.1	<p><b>Indicator:</b> Maximum average real percentage mortality, from stocking to harvest, during the grow-out period (See Real Percent Mortality formula in Annex D).</p> <p><b>Requirement:</b> 20 %</p> <p><b>Applicability:</b> All</p>	<p><b>Instructions to Clients for Indicator 6.1.1 - Calculating Average Real Percentage Mortality (RPM)</b></p> <p>Calculate the weighted average of Real Percentage Mortality using the stocking &amp; harvesting data from every enclosure used by the farm in the last 12 months. Do one calculation per enclosure as follows:</p> <p>1) Determine the number of fish stocked. This number may be obtained from</p> <ul style="list-style-type: none"> <li>- direct counts of fingerlings, or</li> <li>- computed by taking the total weight of stocked fish and dividing by the average weight of the fish stocked</li> </ul> <p>2) Determine the number of fish harvested. This number may be obtained from</p> <ul style="list-style-type: none"> <li>- direct counts of harvested fish, or</li> <li>- computed by taking the total weight of harvested fish and dividing by average weight of the fish harvested</li> </ul> <p>3) Using the formula in Annex D, compute the Real Percentage Mortality for the enclosure (Note 1).</p> <p>4) Repeat steps 1-3 for every other enclosure used by the farm.</p> <p>5) Compute the weighted average RPM for all enclosures over the last 12 months as follows</p> $\text{Weighted Average RPM} = \frac{(\text{RPM}E1 \times \text{Yield}E1) + (\text{RPM}E2 \times \text{Yield}E2) \dots + (\text{RPM}En \times \text{Yield}En)}{(\text{Yield}E1 + \text{Yield}E2 \dots + \text{Yield}En)}$ <p>Where E1, E2, En are the 1st enclosure, the 2nd enclosure and the nth enclosure</p> <p>For first audits, records must cover at least 1 full crop per site (see preamble).</p> <p><b>Note 1:</b> Only use counts of live fish in these calculations. Do not include counts of dead fish when determining number of harvested fish or number of stocked fish.</p> <p><b>Note 2:</b> Only use information from complete crops.</p>										
		a. Obtain receipts and/or statements from seed supplier indicating average weight of seed and numbers (see 5.2.1a). Maintain records to show the total number of fish stocked into each enclosure during the last 12 months. For first audits, farm records must cover a 6 months and records must cover at least 1 full crop per site (see preamble).	A. Review receipts. Confirm that farm records are sufficient to determine number of seed stocked into each enclosure.	Seed receipts indicating average weight of seed and number were reviewed. Farm record are sufficient to determine number of seed stocked into each enclosure.	1			Check seed supplier receipt.	1			
		b. Maintain harvest records for each crop (e.g. selling receipts or processing plant receipts) that are sufficient to show the total number of fish harvested from each enclosure. For first audits, records must cover at least 1 full crop per site (see preamble).	B. Review records. Confirm that farm records are sufficient to determine number of fish harvested from each enclosure.	Records were reviewed. Farm diaries are sufficient to determine number of fish harvested.	1			Check farm diary for number of fish harvested. Records were reviewed.	1			
		c. Calculate the weighted average of the Real Percentage Mortality (see above) using the formula given in Annex D of the Pangasius Standard. Provide calculations to the auditor.	C. Review farm's calculations to verify accuracy. Confirm that average real percentage mortality is ≤ 20%.	Farm calculation was reviewed. The percentage mortality was 14.49. Compliance.	1			The mort rate in one pond selected - pond 13 was 51.9%, pond 3 was 23.14%, pond 9 was 37.25%. Average mortality rate was 20%. Compliance. Ex: Calculate for one production cycle Pond 5 + Pond 10. Show not compliance (= 27%)	1			
6.2 Criteria: Veterinary medicines and chemicals												
		Compliance Criteria (Required Client Actions):		Auditor Evaluation (Required CB Actions):								
6.2.1	<p><b>Indicator:</b> Use only veterinary medicines, chemicals and biological products approved for aquaculture by relevant national authorities and not banned for food fish use in the potential importing country.</p> <p><b>Requirement:</b> Yes</p> <p><b>Applicability:</b> All</p>	a. Prepare a list of all veterinary medicines, chemicals and biological products used on the farm in the past 12 months. For first audits, records must cover at least 1 full crop per site (see preamble).	A. Review list of medicines, chemicals and biological products.	List of medicines, chemical and biological products was reviewed.	1		There is a list of all inputs used including medicines, chemicals and biological products.	1				
		b. Provide records detailing the use of any veterinary medicines, chemicals and biological products on the farm in the last 12 months. For first audits, records must cover at least 1 full crop per site (see preamble).	B. Review records to confirm farm usage of products. During on-site inspection, verify there is no evidence for unrecorded use of any veterinary medicines, chemicals or biological products (i.e. no empty containers or non-inventoried warehouse supplies).	Records named "Medicine monitoring book" to confirm farm usage of products were reviewed. Onsite visit, no evidence for unrecorded use of any chemical.	1			Usages of products are checked in the farm diary.	1			
		c. For the list provided in 6.2.1a, identify suppliers and contact information.	C. Review list.	List of suppliers and contact information was reviewed.	1			List of all inputs used with contact information.	1			
		d. For the list provided in 6.2.1a, show that each item is approved for aquaculture by relevant national authorities.	D. Confirm that listed products used are approved for aquaculture.	List of products used are approved for aquaculture according to Decree No: 69/2010/TT-BNNPTNT issued on 6.12.2012 by Ministry of BNNPTNT.	1			There is the list of products approved for use in aquaculture in Vietnam according to TT 25/2012/TT-BNNPTNT issued in 22.6.2012 by Ministry of Agriculture and Rural Development.	1			
		e. Provide a list of the farm's exports (i.e. sales to parties in foreign countries) over the last 12 months.	E. Review list and compare to farm's sales receipts.	USA, EU, China, Japan, Russia	1			USA, EU, Australia, HongKong, Canada. Farm sale receipts were checked. Total ASC raw material products since ASC certified in 21st Feb 2013 was 4240645kg.	1			
		f. If the farm cannot determine the country of export (6.2.1e), prepare a list of the top five countries importing pangasius from the country where the farm operates (regions operating within the same legislation on this matter, e.g. the EU, are considered as a single country).	F. Review list (as applicable).	NA.	1			List of countries export is available with the chemical and medicine substance banned according to QD 1471/QĐ-BNN-QLCL issued in 20.6.2012 by Ministry of Agriculture and Rural Development.	1			
		g. For each country identified in 6.2.1e (or 6.2.1f as applicable), provide a list of veterinary medicines, chemicals and biological products that are banned from imports of pangasius for human consumption.	G. Review list.	According the decision No.2864/QĐ-BNN-QLCL issued on 24.11.2011 by BNNPTNT informing the list of banned substances in the above following export countries.	1			List of countries export is available with the chemical and medicine substance banned and reviewed.	1			
		h. Show that in the last 12 months, the farm did not use any veterinary medicines, chemicals or biological products that are banned or non-approved in the importing country.	H. Review evidence. Cross-check the farm's export markets (i.e. the importing countries) against the list of products that are banned (see 6.2.1e) in those countries.	Evidences was reviewed. No use of banned substances	1			List of countries export is available with the chemical and medicine substance banned.	1			
6.2.2	<p><b>Indicator:</b> Use only veterinary medicines and chemicals for therapeutic use prescribed by an aquatic animal health specialist (55) based on a verified condition; follow the label specifications concerning the use of the substance for the given purpose (56).</p> <p><b>Requirement:</b> Yes</p> <p><b>Applicability:</b> All</p>	a. Provide records of prescriptions, or the written advice of a suitably qualified aquatic animal health specialist (55), for veterinary medicines and chemicals used on the farm. For first audits, farm records must cover ≥ 6 months.	A. Review records of prescriptions or written advice for veterinary medicines and chemicals.	Records of prescriptions were reviewed.	1		Prior to application of medication, a fish sample is sent to a lab for diagnosis and recommendation of treatment. After receipt of this the farm applies one of the treatments recommended. Prescriptions are issued and approved by the AAH prior to the application of medicines and chemicals. Prescriptions was checked.	1				
		b. For each application of veterinary medicines and chemicals for therapeutic use, provide a description of condition and evidence showing endorsement (prescription) from an aquatic animal health specialist. For first audits, farm records must cover ≥ 6 months.	B. Review written descriptions. Confirm use approved by AAH Specialist.	Prescriptions were reviewed. Prescriptions were approved by AAH specialist.	1			Prescriptions was approved by AAH	1			
		c. If application differs from the label specification, obtain written justification from aquatic animal health specialist. For first audits, farm records must cover ≥ 6 months.	C. Review justifications from AAH Specialist as applicable.	NA	1			Prescriptions are issued and approved by the AAH prior to the application of medicines and chemicals.	1			
		d. Provide copies of the title(s) of the aquatic animal health specialist showing how s/he is suitably qualified for the position.	D. Review evidence. Confirm that AAH Specialist is suitably qualified.	The AAH Specialist - Mr. Phuong is qualified.	1			He is Master of Science - Immunology. He is allowed to do disease treatment by Vet Department. He attended the course "Aquatic Health Management Specialist on ASC	1			

Footnote	[55] Aquatic animal health specialist defined following government's regulations, if such regulations exist in the producing country. If the government does not regulate on this, the following people can be considered as specialists: <ul style="list-style-type: none"> <li>• Veterinarians with at least three months of academic training on fish health management (for a total of at least 60 hours). This training may be included with the veterinary degree.</li> <li>• Aquaculturists (with university or vocational degree) who have completed at least three months of training on fish pathology and treatment (for a total of at least 60 hours). This training may be included with the university or vocational degree.</li> </ul>											
Footnote	[56] Label specifications may be overridden by the recommendations of the aquatic animal health specialist when justification for the decision is documented in the farm book or approved in the animal health plan.											
6.2.3	<p><b>Indicator:</b> Follow the aquatic animal health specialist recommendations on:  1 - how to apply the veterinary medicine and chemicals prescribed  2 - how to handle &amp; store the veterinary medicines and chemicals prescribed  3 - who needs to be informed about the disease and how  4 - how to limit the spread of the disease to neighboring wild or farmed populations</p> <p><b>Requirement:</b> Yes  <b>Applicability:</b> All</p>	<p>a. For veterinary medicines or chemicals applied and for all mortality events notified, provide statements of the specialist indicating his/her recommendation on:  -how to apply the veterinary medicine and chemicals prescribed;  -how to handle &amp; store the veterinary medicine and chemicals prescribed;  -who needs to be informed about the disease; and  -how to limit the spread of the disease to neighboring wild or farmed populations.  For first audits, farm records must cover ≥ 6 months.</p> <p>b. Provide a declaration that the farm followed the recommendations of the aquatic animal health specialist.</p>	<p>A. Review health events to verify that the farm has written recommendations from the AAH Specialist addressing each of these four points.</p> <p>B. Review farm's declaration to confirm following recommendations of the AAH Specialist.</p> <p>C. During on-site visits, inspect to verify proper storage according to the AAH Specialist's recommendations.</p> <p>D. During on-site visits, make direct observations to confirm there is no evidence of any of the recommendations not having been followed.</p>	<p>No health events so far. The written recommendation of AAH Specialist is mentioned the QT09 - Health Control.</p> <p>Farm's declaration was reviewed.</p> <p>On-site visit. Proper storage according to the AAH Specialist's recommendations were verified.</p> <p>On-site visit. No evidence of any of the recommendation not having been followed.</p>	1				<p>The health events was mentioned in the diary and checked during the audit. The prescriptions were checked.</p> <p>Farm's declaration was checked. OK</p> <p>Was checked in the medicine store.</p> <p>Was checked during the on-site visit.</p>	1		
6.2.4	<p><b>Indicator:</b> Allowance to sell fish or fish products before the completion of the withdrawal period specified on veterinary medicine or chemical labels or 750 °D if no withdrawal is specified on label</p> <p><b>Standard:</b> None  <b>Applicability:</b> All</p>	<p>a. For chemical/medicinal treatments in the last 12 months, provide daily records of product use and water temperature during withdrawal periods. For first audits, records must cover ≥ 6 months and at least 1 full crop per site (see preamble).</p> <p>b. Provide labels indicating duration of withdrawal periods. If labels do not specify a withdrawal period, provide evidence that withdrawal periods were &gt; 750 degree days.</p> <p>c. Provide evidence (e.g. receipts) to show no fish were harvested before completion of withdrawal period during the last 12 months. For first audits, farm records must cover ≥ 6 months.</p>	<p>A. Review records from all withdrawals.</p> <p>B. Review labels and completion dates of withdrawal periods.</p> <p>C. Evaluate evidence to verify that no fish were harvested before completion of withdrawal period.</p>	<p>Records from withdrawals of medicines and chemical were reviewed.</p> <p>Labels and completion dates of withdrawal period for antibiotics used were reviewed.</p> <p>No fish were harvested before completion of withdrawal period. Compliance.</p>	1				<p>Review records with withdrawals.</p> <p>Check labels showing the withdrawals.</p> <p>Check in the farm diary for each health events.</p>	1		
6.2.5	<p><b>Indicator:</b> Allowance for the use of antibiotics critical for human medicine, as categorized by the World Health Organization [57].</p> <p><b>Requirement:</b> None  <b>Applicability:</b> All</p>	<p>a. Maintain a list of all antibiotics used on the farm in the last 12 months. For first audits, records must cover at least 1 full crop per site (see preamble).</p> <p>b. Prepare declaration stating that farm did not use any antibiotics critically important for human medicine as categorized by the WHO in the last 12 months.</p> <p>c. Provide the up-to-date list of the WHO [57]</p>	<p>A. Review list of antibiotics used.</p> <p>B. Review declaration. Cross check list of antibiotics used by the farm (see 6.2.5a) against the WHO list of antibiotics critical to human medicine.</p> <p>C. Verify farm holds an up-to-date copy of the WHO list [57]</p> <p>D. During on-site visits, verify there is no evidence of use of antibiotics critical for human medicine through direct observation and inspection.</p>	<p>List of antibiotics used was reviewed.</p> <p>Farm declaration was reviewed. No use any antibiotics critically important for human medicine.</p> <p>Up-to-date copy of the WHO was verified.</p> <p>No use any antibiotics critically important for human medicine during onsite visit.</p>	1				<p>List of antibiotics used and list of WHO available. There is only Vimelfish used in the farm now.</p> <p>Declaration was checked during the audit</p> <p>Up-to-date copy of the WHO list is used.</p> <p>Was checked in the medicine store and in the farm.</p>	1		
Footnote	[57] Refer to the second WHO Expert meeting on Critically Important Antimicrobials for Human Medicine: Categorization for the Development of Risk Management Strategies to Contain Antimicrobial Resistance due to Non-Human Antimicrobial use, 29–31 May 2007 <a href="http://www.who.int/entity/foodborne_disease/resistance/antimicrobials_human.pdf">http://www.who.int/entity/foodborne_disease/resistance/antimicrobials_human.pdf</a>											
6.2.6	<p><b>Indicator:</b> Allowance for prophylactic use of veterinary medicines (excluding vaccines) prior to any evidence of a specific disease problem.</p> <p><b>Standard:</b> None  <b>Applicability:</b> All</p>	<p>a. Provide declaration stating that farm does not use any unauthorized prophylactic veterinary medicines (prior to evidence of a specific disease problem)</p> <p>b. Obtain a declaration from the aquatic animal health specialist indicating that s/he is not aware of any unauthorized prophylactic use of veterinary medicines (prior to evidence of a specific disease problem) by the farm in the last 12 months. For first audits, the period covered by the declaration must be ≥ 6 months.</p> <p>c. Maintain receipts for all purchases of veterinary medicines. For first audits, records must cover at least 1 full crop per site (see preamble).</p>	<p>A. Verify farm holds declaration</p> <p>B. Verify the AAH Specialist declares there is no known unauthorized prophylactic use of veterinary medicines.</p> <p>C. Verify farm maintains records of all purchases of veterinary medicines.</p> <p>D. During on-site visits, inspect the inventory of veterinary medicines to verify that all supplies are accounted for.</p> <p>E. Reconcile the quantities purchased against stocks held on-site and records for usage (e.g. 6.2.5a) based on reviewing a sample of medicines.</p>	<p>The AAH Specialist declaration was verified.</p> <p>The AAH Specialist declaration was verified.</p> <p>Receipt of medicine purchases were verified. Compliance</p> <p>Inventory of veterinary medicines was inspected during the audit. Compliance.</p> <p>Records for usage were checked and compared with the quantities purchased stocks held on-site.</p>	1				<p>Check the AAH Specialist declaration. OK</p> <p>Check the AAH Specialist declaration. OK</p> <p>Receipt of medicine purchase kept.</p> <p>Inventory of veterinary medicines was checked during the audit. OK</p> <p>Records for usage were checked and compared with the quantities purchased stocks held on-site. OK</p>	1		
6.2.7	<p><b>Indicator:</b> Allowance for use of veterinary medicine (excluding vaccines) to serve as growth promoters [58].</p> <p><b>Requirement:</b> None  <b>Applicability:</b> All</p>	<p>a. Obtain a declaration from the applicant, endorsed by an aquatic animal health specialist indicating that there has been no use of veterinary medicines (excluding vaccines) as growth promoters by the farm in the last 12 months. For first audits, the period covered by the declaration must be ≥ 6 months.</p>	<p>A. Verify the AAH Specialist supports the declaration that there is no use of veterinary medicine as growth promoters.</p> <p>B. Reconcile the quantities of veterinary medicines purchased against stocks held on-site and records for usage (e.g. 6.2.5a) based on reviewing a sample of medicines.</p>	<p>The AAH Specialist declaration that there is no use of veterinary medicine as growth promoters was verified.</p> <p>Records for usage were checked and compared with the quantities purchased stocks held on-site.</p>	1				<p>Check the AAH Specialist declaration. OK</p> <p>Records for usage were checked and compared with the quantities purchas</p>	1		
Footnote	[58] Growth promoters: Veterinary medicines, such as antibiotics, to be given to healthy fish for the sole purpose of making them grow faster (i.e., not to treat a specific disease).											
6.3 Criteria: Pangasius health plan												
	<b>Compliance Criteria (Required Client Actions):</b>		<b>Auditor Evaluation (Required CB Actions):</b>									
	a. Prepare the farm's written pangasius health plan containing all required elements (Annex E).		A. Review health plan for compliance with Annex E.									
	b. Obtain review and written approval of the pangasius health plan by the farm's aquatic animal health specialist.		B. Confirm that the farm's aquatic animal health specialist has reviewed and approved the pangasius health plan.									
<b>Indicator:</b> Presence of a written pangasius health plan reviewed yearly, updated and approved by a specified aquatic animal health specialist [59] [See Annex E for Health Plan.			<p>Health plan completed and approved by aquatic animal health specialist. Pond preparation is mentioned QT2 - Farming Procedures for transportation of seed and harvested fish are mentioned in the PLO2/QT02 and QT2 - Farming</p> <p>Approved by AAH - Mr. Phuung in 10.12.2011</p>	1					<p>Health plan reviewed and approved by aquatic animal health specialist. Pond preparation is mentioned in the Annex and implemented at the farm except pond preparation, transport seed and harvesting, farming described in Farming QT02, updated in 3.9.2013. The Health Plan is QT09.</p> <p>The plan is reviewed and signed by the AAH. Updated in the 21.3.2013</p>	1		

6.3.1	<p><b>Requirement:</b> Yes</p> <p><b>Applicability:</b> All</p>	<p>c. Review the health plan at least once every 12 months. Update as needed and obtain approval by the farm's aquatic animal health specialist.</p>	<p>C. Confirm that farm has health plan reviewed, updated, and approved every 12 months. For first audits, the response is 'not applicable'.</p>	NA	1	NA	1	
			<p>D. During on-site visit, verify that the plan is implemented and effective.</p>	<p>On-site visit: The plan is implemented and effective.</p>	1	The plan is implemented.	1	
Footnote [59] GlobalG.A.P. AB 5.2.3 was taken as reference and amended to fit with the requirements of the PAD stakeholders.								
<b>6.4 Criteria: Holding-unit specific record-keeping</b>								
<b>Compliance Criteria (Required Client Actions):</b>								
<b>Auditor Evaluation (Required CB Actions):</b>								
6.4.1	<p><b>Indicator:</b> Availability of records of the name, reasons for use, dates, amounts and withdrawal times of all veterinary medicines and chemicals used in hatchery and grow-out facilities</p> <p><b>Requirement:</b> Yes</p> <p><b>Applicability:</b> All</p>	<p>a. Maintain records that identify all the veterinary medicines and chemicals used at the grow-out facility. For first audits, farm records must cover ≥ 6 months.</p> <p>b. Maintain copies of labels showing withdrawal times at the grow-out facility. For first audits, records must cover at least 1 full crop per site (see preamble).</p> <p>c. Maintain signed declarations by the farm's aquatic animal health specialist stating the date, diagnosis, treatment and withdrawal times (if different from the label) of all veterinary medicines and chemical used at the grow-out facility. For first audits, farm records must cover ≥ 6 months.</p> <p>d. Obtain a signed declaration from seed suppliers identifying any chemicals or veterinary medicines that were used in production of seed. For first audits, records must cover at least 1 full crop per site (see preamble).</p>	<p>A. Verify the farm maintains purchase records.</p> <p>B. Verify the farm maintains records showing withdrawal times at the grow-out facility.</p> <p>C. Verify the farm maintains relevant declarations from the AAHS at the grow-out facility.</p> <p>D. Verify the farm obtains declarations from all seed suppliers.</p>	<p>The purchase records were verified.</p> <p>Label showing withdrawal times were verified.</p> <p>Prescriptions stating the date, diagnosis, treatment and withdrawal times of all veterinary medicines and chemical used from AAHS were verified.</p> <p>Sign declaration from seed supplier - Tho Lai hatchery - was available. Records of chemical and medicines used for each stocking. Ex: Pond 4: Pond 4, Syme fish, Aqua C fish.</p>	1	<p>See 6.2.6c.</p> <p>See 6.2.4 a. Farm diary was checked during the audit. -OK</p> <p>Check the prescription.</p> <p>Sign declaration from seed supplier - Tho Lai hatchery - was available.</p>	1	1
6.4.2	<p><b>Indicator:</b> Availability of records of the source, size and quality of the seed stocked. Records of seed quality should include:</p> <ol style="list-style-type: none"> <li>1- Description of gross signs and any abnormalities</li> <li>2- List of veterinary medicines, chemicals and biological products used in earlier life stages</li> <li>3- Results of pathogen testing as legislated</li> </ol> <p><b>Requirement:</b> Yes</p> <p><b>Applicability:</b> All</p>	<p>a. For all stocking events in the last 12 months, obtain a signed letter from the seed supplier reporting:</p> <ul style="list-style-type: none"> <li>-the source, size and quality of seed supplied;</li> <li>-the date supplied;</li> <li>-a description of any external signs of abnormalities at the time of sale;</li> <li>-list of veterinary medicines, chemicals and biological products used in earlier life stages (i.e. used at any time from spawning onwards); and</li> <li>-results of pathogen testing following legislation (as applicable).</li> </ul> <p>For first audits, farm records must cover ≥ 6 months.</p>	<p>A. Verify the farm maintains records for seed quality as required.</p>	<p>Records for seed quality were verified. Reporting required by standard comply.</p>	1	<p>Records for seed quality are check OK.</p>	1	
6.4.3	<p><b>Indicator:</b> Daily records showing regular monitoring of fish for signs of stress [60] or disease are kept</p> <p><b>Requirement:</b> Yes</p> <p><b>Applicability:</b> All</p>	<p>a. Maintain daily records (e.g. diary) of monitoring for stress or disease. Records shall identify:</p> <ul style="list-style-type: none"> <li>-date;</li> <li>-presence of behavioural and external signs of abnormalities (i.e. feeding behaviour, swimming behaviour, lesions, spots, large ecto-parasites, fin erosion, etc); and</li> <li>-number of dead fish.</li> </ul> <p>For first audits, records must cover at least 1 full crop per site (see preamble).</p>	<p>A. Review daily records to confirm that all reporting elements are included. Verify compliance.</p>	<p>Fish are monitored daily and recorded when there are specific signs of stress. In addition, there is a fortnightly report on the stress situation.</p>	1	<p>fish are monitored daily but it is only recorded when there are specific signs of e.g. stress. In addition, there is a fortnightly report on the stress situation.</p>	1	
Footnote [60] Signs of stress or disease include abnormal behaviour (e.g., swimming), reduced appetite and external abnormalities (e.g., lesions, spots and fin erosion).								
6.4.4	<p><b>Indicator:</b> All mortality events with daily mortality above the average daily mortality in the farm are reported to the aquatic animal health specialist</p> <p><b>Requirement:</b> Yes</p> <p><b>Applicability:</b> All</p>	<p><b>Instructions to Clients for Indicator 6.4.4 - Establishing a Threshold for the Reporting of Mortality Events</b></p> <p>Indicator 6.4.4 requires that farms report all significant mortality events to the aquatic animal health specialist. The ASC Pangasius Standard does not prescribe a specific threshold value for all farms to apply across all circumstances. Instead, the Pangasius Standard requires farms to confer with their aquatic animal health specialist to develop a threshold for reporting mortality events that is appropriate for identifying significant or "above average" mortality events based on farm data. In establishing a threshold, the farm must consider the following:</p> <ul style="list-style-type: none"> <li>-thresholds must be generated using farm data for mortality and this shall include farm information from at least 1 randomly selected pond;</li> <li>-thresholds must be stage-specific to account for differing mortality rates during the 1st week, the 1st month, and any month after that;</li> <li>-the farm's aquatic health specialist must set and approve the threshold value, not the farmer; and</li> <li>-the farm must describe how the threshold was established in the farm's Pangasius Health Plan.</li> </ul> <p>a. Maintain a daily record of monitoring farm enclosures for mortality (see 6.4.3). For first audits, records must cover at least 1 full crop per site (see preamble).</p> <p>b. Have the farm's aquatic animal health specialist review the farm's daily records for mortality. Ask the AAH Specialist to specify a threshold for the reporting of mortality events based on review of farm mortality rates (see instructions).</p> <p>c. Describe how the threshold was established in the farm's Pangasius Health Plan (see 6.3.1).</p> <p>d. Maintain records to show that the farm reports all mortality events exceeding threshold to the AAH Specialist. For first audits, farm records must cover ≥ 6 months.</p>	<p>A. Review daily mortality records.</p> <p>B. Verify the farm's AAH Specialist has reviewed daily mortality records before specifying a threshold for the reporting of mortality events.</p> <p>C. Review the proposed mortality threshold in the farm's Pangasius Health Plan to confirm compliance with requirements.</p> <p>D. Review reporting records and cross-check against daily mortality records to confirm compliance with requirements.</p>	<p>Daily mortality record were reviewed.</p> <p>Daily mortality records are daily reviewed by Farm's AAH Specialist. These records were verified.</p> <p>Based on the farm data during one year, 100 ponds, the proposed mortality threshold is set up in the farm's Health Plan. Compliance.</p> <p>No mortality events so far. Cross-check against daily mortality record were reviewed. Compliance</p>	1	<p>daily mortality records were available.</p> <p>AAH Specialist reviews and signs in the farm diary.</p> <p>Based on the farm data during one year, 100 ponds, the proposed mortality threshold is set up in the farm's Health Plan. Compliance.</p> <p>Record of deadfish, antibiotics used and withdrawal period was kept. However, the report of all mortality events exceeding threshold has not been established. Ex: Check farm diary in Pond 13 in 17.01.2013, deadfish was 0.45% instead of 0.07%. This was mortality event according to Health Management Plan - Threshold.</p>	1	1
<b>6.5 Criteria: Fish welfare.</b>								
<b>Compliance Criteria (Required Client Actions):</b>								
<b>Auditor Evaluation (Required CB Actions):</b>								

6.5.1	<p><b>Indicator:</b> Minimum average growth rate</p> <p><b>Requirement:</b> 3.85 g/day</p> <p><b>Applicability:</b> All</p>	<p><b>Instructions to Clients for Indicator 6.5.1 - Calculating Average Growth Rate</b></p> <p>Annex D of the ASC Pangasius Standard provides formulas for calculating yield and average growth rate (AGR). Farms must perform these calculations using harvest and stocking data from individual ponds (i.e. it is calculated on a crop-by-crop basis). It should be done as follows:</p> <p>Yield (from Pond1) = total weight of fish harvested (from Pond1) - total weight of fish stocked (Pond1)</p> <p><math>AGR_{P1} = \text{Yield}_{P1} / \text{duration of production cycle (Pond1)}</math></p> <p>Where weights are given in grams (g), duration is given in number of days (d), AGR is computed in units of grams per day (g/d), and enclosures are identified by subscripts P1, P2, P3 etc.</p> <p>Repeat the AGR calculations for the second pond, third pond... etc. until an AGR has been determined for each pond that was harvested. For first audits, records must cover at least 1 full crop per site (see preamble). Next calculate the farm-wide weighted average AGR using the following formula:</p> <p><math>\text{Weighted Average AGR} = [(AGR_{P1} \times \text{Yield}_{P1}) + (AGR_{P2} \times \text{Yield}_{P2}) \dots + (AGR_{Pn} \times \text{Yield}_{Pn})] / (\text{Yield}_{P1} + \text{Yield}_{P2} \dots + \text{Yield}_{Pn})</math></p> <p><b>Clarification note:</b> Indicator 6.5.1 was developed under the assumption that: - fish are stocked at 50 grams, - harvested at 1,000 grams and - average production cycle is 8 months.</p> <p>Given that specific growth rates of Pangasius are variable with body size (i.e. size and age dependent), formulas will yield a reduced level of absolute growth if fish are harvested at a substantially smaller size than 1 kg. (e.g. farms that harvest fish at 600-700g average body weight).</p> <p>Auditors are instructed as to evaluate indicator 6.5.1 as follows. Farms must provide auditors with sufficient information to verify average fish weight at stocking, average fish weight at harvest, and average duration of production cycle. Auditors shall review the farm's calculations of observed growth rate and monitor whether the farm is in compliance.</p>									
		a. Maintain records (e.g. receipts from seed suppliers) showing the weight of fish stocked into each enclosure (e.g. see 6.1.1). For first audits, records must cover at least 1 full crop per site (see preamble).	A. Verify farm maintains records of the weight of fish stocked in each enclosure.	Farm records of weight of fish stocked were verified.	1						1
		b. Maintain records showing the weight of fish harvested from each enclosure (see 2.4.2b). For first audits, records must cover at least 1 full crop per site (see preamble).	B. Verify farm maintains records of the weight of fish harvested from each enclosure.	Farm records of weight of fish harvested were verified.	1						1
		c. Calculate the average growth rate of fish in each enclosure as described above (see instructions).	C. Review calculations to confirm accuracy and completeness.	Calculations were reviewed. Accuracy and completeness.	1						1
		d. Using results of 6.5.1c, calculate the farm-wide weighted average AGR.	D. Verify that the farm-wide weighted average AGR complies with requirements.	First inspection. One pond is selected. Comply with requirements.	1						1
6.5.2	<p><b>Indicator:</b> Maximum fish density at any time</p> <p><b>Requirement:</b> 38 kg/m<sup>2</sup> for ponds and pen</p> <p><b>Applicability:</b> Ponds and Pens</p>	a. Provide a plan of the farm showing surface area (m <sup>2</sup> ) of each enclosure.	A. Review farm's calculation of surface area for each enclosure and confirm by inspection during on-site audit.	Farm calculation showing surface area of each pond were reviewed and confirmed during the site audit.	1					1	
		b. Maintain records of the total weight (kg) of fish harvested from each pond and/or pen (see 2.4.2b). For first audits, records must cover at least 1 full crop per site (see preamble).	B. Confirm the farm keeps accurate record of total weight of fish harvested from each pond and/or pen.	Farm records of weight of fish harvested were verified.	1						1
		c. For each enclosure, divide the weight of fish harvested (result from 6.5.2b) by the surface area of the enclosure (results from 6.5.2a) to calculate fish density (kg/m <sup>2</sup> ). For first audits, records must cover at least 1 full crop per site (see preamble).	C. Review calculations for fish density at harvest to verify compliance.	Calculations for fish density at harvest were reviewed. Compliance	1						1
		d. In addition to calculating fish density at harvest (6.5.2c), farms shall record monthly estimates of fish density for each enclosure using estimated biomass (e.g. from farm diaries) and surface area (see 6.5.2a). For first audits, farm records must cover ≥ 6 months.	D. Review monthly estimates of fish density to verify compliance.	Monthly estimates of fish density were done and reviewed.	1						1
6.5.3	<p><b>Indicator:</b> Maximum fish density at any time</p> <p><b>Requirement:</b> 80 kg/m<sup>3</sup> for cages</p> <p><b>Applicability:</b> Cages</p>	a. Provide a description of the system specifying the total number of cages and volume (m <sup>3</sup> ) of each cage.	A. Review farm's calculation of volume for each cage and confirm by inspection during on-site audit.	N/A. Ponds	1					1	
		b. Maintain records of the total weight (kg) of fish harvested from each cage. For first audits, records must cover at least 1 full crop per site (see preamble).	B. Confirm the farm keeps accurate record of total weight of fish harvested from each cage.	N/A. Ponds	1						1
		c. For each cage, divide the weight of fish harvested (result from 6.5.3b) by the volume of the cage (results from 6.5.3a) to calculate fish density (kg/m <sup>3</sup> ). For first audits, records must cover at least 1 full crop per site (see preamble).	C. Review calculations for fish density at harvest to verify compliance.	N/A. Ponds	1						1
		d. In addition to calculating fish density at harvest (6.5.3c), farms shall record monthly estimates of fish density for each cage using estimated biomass (e.g. from farm diaries) and cage volume (see 6.5.3a). For first audits, farm records must cover ≥ 6 months.	D. Review monthly estimates of fish density to verify compliance.	N/A. Ponds	1						1
6.6 Criteria: Predator control											
		<b>Compliance Criteria (Required Client Actions):</b>			<b>Auditor Evaluation (Required CB Actions):</b>						
6.6.1	<p><b>Indicator:</b> Use of lethal predator [61] control</p> <p><b>Requirement:</b> No</p> <p><b>Applicability:</b> All</p>	a. Prepare a list of all predator control devices and their locations.	A. Review list.	No predator control devices used in the farm.	1					1	
		-	B. Inspect sites to verify no use of lethal predator controls.	N/A. No use of lethal predator controls.	1					1	
Footnote		[61] Predators are defined as animals which have the potential to kill healthy pangasius. These standards include all types of predators during the production period, but only birds, reptiles and mammals during the period of preparation of the holding units (e.g., ponds, cages and pens). Rats and mice are excluded from consideration as they are unlikely to harm fish on the farm, be endangered or pose a conservation concern.									

6.6.2	<p><b>Indicator:</b> Mortality of IUCN red listed species.</p> <p><b>Requirement:</b> 0 (zero)</p> <p><b>Applicability:</b> All</p>	<p><b>Instruction to Clients for Indicator 6.6.2 - Presence of IUCN Red Listed Species</b></p> <p>Determine whether IUCN red list species are present in the region as follows:          - go to <a href="http://www.iucnredlist.org/">http://www.iucnredlist.org/</a>          - follow to "other search options"          - select "Taxonomy"          - select "Animalia"          - indicate appropriate "Location", "Systems", "Habitat".          - click on "run search" and record animal species listed and whether they are threatened by the farming activity.          Note: The IUCN Red List uses nine categories for ranking species according to threat, and search results may include species that are not currently threatened. For the purposes of determining whether a farm complies with indicator 6.6.2, species in the following IUCN categories may be excluded from further analyses: "Not evaluated", "Data Deficient", and "Least Concern".</p>									
		a. Perform analysis. Record all IUCN red listed species occurring in the area of the farm.	A. Repeat analysis to verify that client obtained an accurate result.	Analysis was done by <i>outsourced</i> consultant. IUCN red list search is available and accurate. A record of all IUCN red list species in the area is available.	1			IUCN red list search is available and accurate, a record of all IUCN red list species in the area is available.	1		
		b. If any IUCN red listed species are identified in the area of the farm (including receiving and source waters), write a procedure which describes how the farm will avoid causing mortality.	B. Verify that farm procedures are appropriate and implemented (as applicable).	Procedure to deal with in case of seeing any species in the red list is available, appropriate and implemented. The procedure is interpreted with photos & short instructions for workers.	1			Procedure to deal with in case of seeing any species in the red list is available, appropriate and implemented. The procedure is interpreted with photos & short instructions for workers.	1		
		.	C. During local community interviews, verify there is no evidence of the farm causing mortality of IUCN red listed species (also see indicator 2.2.4(E)).	N/A. According to the government representatives, there was no IUCN red listed species in this area.	1			(see 6.6.2 a)	1

<u>Official Employee ID</u> The farm only provided 28 copies of official ID and 2 residential certificates (which also show the birth date of employee) out of 42 employees. On the day of the audit the facility collected original official IDs for 11 employees and made copies of them. However, there was still one birth date certificate missing.
<u>Access to Potable Drinking Water</u> There were a lot of mosquitoes flying around the kitchen area without any prevention measures.
<u>Employees from outside the community</u> The farm did not provide a written explanation to the local communities to justify the action that they employed workers outside the local community.

examples:

action plan	deadline	action plan approved by IMO
Root Cause: xxx Corrective Action: xxx Timeframe: xxx		
<p><u>Root Cause:</u> Some workers keep the ID at their hometowns so they can't give us the copy of their ID.</p> <p><u>Corrective Action:</u>            The worker provided us the photo of his ID on 15th December 2012.            In addition, we update this requirement in the recruitment procedure.</p>	<p>Prior to Certification</p>	<p>ok</p>
<p><u>Root Cause:</u>            We applied the incorrect method to reject flies in the kitchen room such as the fan electricity.... In addition, the kitchen locate near the mango garden where is suitable for the flies development.</p> <p><u>Corrective Action:</u>            We are using the pest reject machine and the mesh food cover. These methods are very effective for preventing the flies.</p>	<p>Verification on next audit</p>	<p>ok</p>
<p><u>Root Cause:</u>            There are no regulations in the farming documentation system for this issue. Therefore, we don't give an explanation for recruiting the people from outside the local community.</p> <p><u>Corrective Action:</u>            We write an explanation for recruiting workers outside the local community. Beside that we update this content in the Recruitment procedure.</p>	<p>03. Feb 13</p>	<p>ok</p>

**AUDIT MANUAL - ASC Pangasius Standard**  
Created by the Pangasius Aquaculture Dialogue

Scope: *Pangasianodon hypophthalmus, Pangasius bacourti*

**Preamble:**

In order to determine the level of compliance against the ASC Pangasius Standard it is essential to use information of completed crop cycle(s), or on a specific point in time in the crop (e.g. stocking) for several requirements. For this reason, for first audits, it is necessary for farms to present full data on at least one or more completed crop cycle(s) per site at the time of the assessment.

Therefore, at the time of the first audit:

- farmer must be able to show full records (e.g. feed-use, mortality rate, etc.) of at least 1 completed crop cycle per site (i.e. from stocking to harvest) and the relevant information for all the crops stocked after having stocked that crop
- certifier must use these records of each site to calculate the level of compliance of the relevant indicators

Applicable to all relevant requirements in this Audit Manual:

**Client:** At first audit: data of at least 1 full crop cycle per site must be made available to certifier.

**Auditor:** At first audit: data of at least 1 full crop cycle per site must be used to determine compliance.

add "1" per criteria in applicable column below:

Social requirements in the standards shall be audited by an individual who is a lead auditor in conformity with SAAS Procedure 200 section 3.1.

Initial/Recertification

Surveillance 1

**PRINCIPLE 7: DEVELOP AND OPERATE FARMS IN A SOCIALLY RESPONSIBLE MANNER THAT CONTRIBUTES EFFECTIVELY TO COMMUNITY DEVELOPMENT AND POVERTY ALLEVIATION.**

**Evaluation results**

7.1 Criteria: Labor law		Compliance criteria (Required Client Actions):		Description			ok	minor	major	Description	ok	minor	major
7.1.1	<b>Indicator:</b> Compliance with labor laws in the country where pangasius is produced <b>Requirement:</b> Yes <b>Applicability:</b> All	<b>Compliance criteria (Required Client Actions):</b> a. Obtain all national and local labor regulations applicable to the farm. Regulations should cover at least the following issues: labor contracts, child labor, working time, working/living conditions, minimum wage and benefits/allowance, health and safety, presence of on-farm regulation. b. Ensure that the farm and all employees on the farm comply to the labor regulations.	The farm obtained all national and local labor regulations including labor contracts, child labor policy, working hours, living and working conditions, minimum wages and benefits, health and safety etc.						NA, no social audit conducted				
			According to the document review, plant tour and employees' interview, the actions conducted in the farm were in compliance with the labor regulations.	1			NA, no social audit conducted						
7.2 Criteria: Child labor [62] and young workers [63]		Compliance criteria (Required Client Actions):		Description			ok	minor	major	Description	ok	minor	major
Footnote	[62] Child: Any person less than 15 years of age, unless local minimum age law stipulates a higher age for work or mandatory schooling, in which case the higher age would apply. If however, local minimum age law is set at 14 years of age in accordance with developing country exceptions under ILO Convention 138, the lower age will apply. Child labor does not include children helping their parents on their own farm, provided that working does not jeopardize their schooling or health.												
Footnote	[63] Young worker: Any worker between the age of child as defined and under the age of 18.												
7.2.1	<b>Indicator:</b> Minimum age of workers <b>Requirement:</b> Yes <b>Applicability:</b> All	<b>Compliance criteria (Required Client Actions):</b> a. Maintain a list of all employees employed in the farm indicating date of birth b. Maintain copies of the official ID of all the employees listed showing date of birth c. Ensure that no employee is younger than 15 years old (use birthdate to calculate exact age), see footnote [62] d. Provide a declaration stating that the farm is against child labor and will not employ anybody younger than 15 years old.	The farm maintained a name list for all employees hired by the farm and date of birth was also indicated in the name list.						NA, no social audit conducted				
			The farm only provided 28 copies of official ID and 2 residential certificates (which also shows the birth date of employee) out of 42 employees. The farm also collected original official ID for 11 employees on the audit day. However, there was still one birth date certificate missing. According to the farm management, the missing official ID was belonged to	1			NA, no social audit conducted						
			According to the provided official ID copies, original official ID, residential certificates and employees' interview, there was no employee younger than 15 years old hired by the farm.				NA, no social audit conducted						
			The farm established its own recruiting procedure and also set up the child labor policy. As per the procedure and policy, it was noted that there was a statements saying that no workers under 15 could be hired by the farm.	1			NA, no social audit conducted						
7.2.2	<b>Indicator:</b> For workers under 18 years olds 1 - Work does not jeopardize schooling 2 - Work, when added to the hours of schooling, does not exceed 10 hour/day 3 - Work is restricted to light work [64] 4 - Work is restricted to non-hazardous work [65] <b>Requirement:</b> Yes <b>Applicability:</b> Farms with employees younger than 18 years old	<b>Compliance criteria (Required Client Actions):</b> a. Ensure that the contracts for workers below 18 years old state the rights of young workers (as indicated in this Requirement) and job descriptions are detailed enough to allow auditors to assess that, for such workers, work is restricted to light work and is not hazardous b. Maintain records of schooling commitments of each employee younger than 18 years old c. Maintain daily records of working hours for all workers younger than 18 years old. For first audits, farm records must cover ≥ 6 months. d. Ensure that young workers' rights as indicated in this Requirement are duly respected in the farm	N/A. No young workers under 18 years old were hired by the farm. The farm maintained a statement that no workers under 18 could be hired because the job was not appropriate for young workers.						NA, no social audit conducted				
			N/A. No young workers under 18 years old were hired by the farm. The farm maintained a statement that no workers under 18 could be hired because the job was not appropriate for young workers.	1			NA, no social audit conducted						
			N/A. No young workers under 18 years old were hired by the farm. The farm maintained a statement that no workers under 18 could be hired because the job was not appropriate for young workers.	1			NA, no social audit conducted						
			N/A. No young workers under 18 years old were hired by the farm. The farm maintained a statement that no workers under 18 could be hired because the job was not appropriate for young workers.	1			NA, no social audit conducted						
Footnote	[64] Light Work: (ILO convention 138, article 7.1) Light work is work that is 1) not likely to be harmful to a child's health or development and 2) not likely to prejudice their attendance at school, participation in vocational orientation or training programs, or diminish their capacity to benefit from instruction received.												
Footnote	[65] Hazardous work: Work which, by its nature or circumstances in which it is carried out, is likely to harm the health, safety or morals of workers.												
7.3 Criteria: Forced and compulsory labor [66]		Compliance criteria (Required Client Actions):		Description			ok	minor	major	Description	ok	minor	major
Footnote	[66] Forced (Compulsory) labor: All work or service that is extracted from any person under the menace of any penalty for which a person has not offered him/herself voluntarily or for which such work or service is demanded as a repayment of debt. "Penalty" can imply monetary sanctions, physical punishment, or the loss of rights and privileges or restriction of movement (withholding of identity documents).												
		a. Ensure that all contracts clearly state workers' freedom to terminate their employment and receive full payment until the last day of their employment	As per the provided copies of labor contracts by the farm, it was noted that workers could freely terminate their employment and receive full payment until the last day of their employment.						NA, no social audit conducted				

7.3.1	<p><b>Indicator:</b> Workers are free to terminate their employment and receive full payment until the last day of their employment, based on reasonable [67] notice given to their employer [68]</p> <p><b>Requirement:</b> Yes</p> <p><b>Applicability:</b> All</p>	b. Ensure that workers' rights as indicated in this Requirement are duly respected.	According to employees' interview, workers had all the rights mentioned in the labor contract without any interference from farm management. Whenever they decided to quit their jobs, they could send application to farm management and the farm would let them go at their wills.	1		NA, no social audit conducted				
		c. Ensure that nobody in the farm or on behalf of the employer withholds employee's original identity papers	According to employees' interview, the farm only kept the copies of their official ID papers and the original ones were kept by themselves.	1		NA, no social audit conducted				
		d. Ensure that the farm does not withhold any part of workers' salaries, benefits, property or documents in order to oblige them to continue working for the employer	According to employees' interview, the farm did not withhold any salaries, benefits or documents of workers, all the salaries and benefits would be paid around 10th of each month for the preceding month. And each worker had personal locker in dormitory for personal property or documents	1		NA, no social audit conducted				
		e. Ensure that no employee is obligated to work at the farm to repay debt	According to employees' interview, there was no situation happened to workers that they had to work in the farm to repay debt.	1		NA, no social audit conducted				
		Footnote	[67] As stated in the contract.							
Footnote	[68] Employers are those workers who, working on their own account or with one or a few partners, hold the type of job defined as a self-employed job, and in this capacity, on a continuous basis (including the reference period) have engaged one or more persons to work for them in their business as employees.									
<b>7.4 Criteria: Health and safety</b>		<b>Compliance criteria (Required Client Actions):</b>								
7.4.1	<p><b>Indicator:</b> The employer provides a non-hazardous working and living environment</p> <p><b>Requirement:</b> Yes</p> <p><b>Applicability:</b> All</p>	a. Maintain a list of all the health and safety hazards in the working and living environment of employees	The farm had procedures in place to identify working risks for each position and also kept a list of all the health and safety hazards that might be happened in the farm.	1		NA, no social audit conducted				
		b. Provide Standard Operating Procedures (SOP) or Safe Practice guidelines (SOP) for all health and safety hazards listed	The farm had Standard Operation Procedures in place to guide workers working in the proper and correct way especially for those positions with potential risks.	1		NA, no social audit conducted				
		c. Ensure that employees are complying to the farm SOP on health and safety and that are adequately protected against hazards	According to employees' interview, the farm provided related training courses to workers and supervisors were appointed to guide and supervise them work in the SOP way.	1		NA, no social audit conducted				
		d. Ensure that employees have constant access to potable/safe drinking water	According to the provided water test report, it was noted that the water provided in the farm was drinkable. However, it was noted that there were a lot of mosquitoes flying around the kitchen area without any prevention measure.	1		NA, no social audit conducted				
		e. Ensure that sanitary conditions for the safe disposal of human waste are in practice.	The farm signed contracts with licensed companies and authorized these companies to collect and dispose off the human and chemical waste produced by the farm.	1		NA, no social audit conducted				
		f. Ensure that the employees' housing is constructed of materials able to withstand local conditions	The dormitory was built of cement and equipped with metal doors and able to withstand local conditions.	1		NA, no social audit conducted				
7.4.2	<p><b>Indicator:</b> Workers are aware of the health and safety hazards [69] at the work place and how to deal with them</p> <p><b>Requirement:</b> Yes</p> <p><b>Applicability:</b> All, Farm-Wide</p>	a. Ensure that all workers are aware of the hazards listed on 7.4.1a and of the SOP in 7.4.1b	According to employees' interview, they were provided with training courses related to how to identify working risks or hazards, how to work in the proper and safe way and how to prevent hazards.	1		NA, no social audit conducted				
Footnote	[69] Hazard: The inherent potential to cause injury or damage to people's health—for instance unequipped to handle heavy machinery safely/unprotected exposure to harmful chemicals.									
7.4.3	<p><b>Indicator:</b> The employer records all accidents, even if minor [70], and take preventive and corrective action for each</p> <p><b>Requirement:</b> Yes</p> <p><b>Applicability:</b> All</p>	a. Maintain records of all accidents and corrective actions taken. For first audits, farm records must cover ≥ 6 months.	N/A. According to employees and management interview as well as document review, no accidents happened in the past 6 months.	1		NA, no social audit conducted				
		b. Ensure that corrective actions are in place as relevant	N/A. According to employees and management interview as well as document review, there were no accidents in the past 6 months.	1		NA, no social audit conducted				
Footnote	[70] Accidents that could not be handled in-house, the person was taken to the closest clinic									
7.4.4	<p><b>Indicator:</b> Employer ensures that all permanent workers have health insurance [71]</p> <p><b>Requirement:</b> Yes</p> <p><b>Applicability:</b> All</p>	a. Maintain a list of all permanent workers	The farm maintained a list of all employees hired. All employees hired by the farm were permanent workers.	1		NA, no social audit conducted				
		b. Provide evidence showing health insurance coverage for all permanent workers	According to the provided health insurance cards as well as employees' interview, all permanent workers had been provided with health insurance.	1		NA, no social audit conducted				
Footnote	[71] Health insurance is required for workers who are employed for >3months/year. If not covered under national law employers must provide insurance to cover 100% of any job-related accident/injury for permanent workers. The cost associated with permanent disabilities generated from a job related accident is, however, not included.									
<b>7.5 Criteria: Freedom of association and collective bargaining [72]</b>		<b>Compliance criteria (Required Client Actions):</b>								
Footnote	[72] Collective bargaining: Voluntary negotiation between employers and organizations of workers in order to establish the terms and conditions of employment by means of collective (written) agreements.									
7.5.1	<p><b>Indicator:</b> Workers [73] have the right to form or join organizations to defend their rights (including their right to collective bargaining), without interference from the employer and without suffering negative consequences as a result of exercising this right [74].</p>	a. Maintain copies of employees' contracts and ensure that contracts explicitly state the right of freedom of association.	According to document review, copies of employees' contracts were kept by the farm, which clearly stated the rights of freedom of association. In addition, based on employees' interview, workers confirmed that they all had the freedom to join the union without interference from employer.	1		NA, no social audit conducted				
		b. Ensure that workers have the freedom to form and join any trade union, are free of any form of interference from employers or competing organizations set up or backed by the employer. ILO specifically prohibits "acts which are designated to promote the establishment of worker organizations or to support worker organizations under the control of employers or employers' organizations.	Meetings were held regularly between the union and employers to make sure that all the labor rights were well respected by employer.	1		NA, no social audit conducted				
		c. Ensure that trade unions and/or civil society organizations involved in Labor rights, are able to access/inform all workers directly (posters, pamphlets, visits).		1						

	<p><b>Requirement:</b> Yes</p> <p><b>Applicability:</b> All</p>	<p>d. Ensure that trade union representatives have access to their members in the workplace at reasonable times.</p>	<p>According to employees' interview, the union representative was also the worker in the farm and could meet their members in the farm at reasonable times.</p>	1			NA, no social audit conducted			
		<p>e. Provide a declaration explicitly stating the employer's commitment to freedom of association and collective bargaining rights of all.</p>	<p>The declaration was included in the labor contracts and clearly stated the employer's commitment to freedom of association.</p>				NA, no social audit conducted			
				1						
Footnote	<p>[73] Worker: A person who enters an agreement of any duration with an enterprise to work for the enterprise in return for remuneration in cash or in kind. Immediate family members of the farm owner (i.e., children, spouse, parents, brothers and sisters) and exchange labor may not be considered as workers, unless they express their desire to be workers.</p>									
Footnote	<p>[74] Workers must not be prohibited from accessing such organizations when they exist. If they do not exist or are illegal, companies must make it clear that they are willing to engage in a collective dialogue through a representative structure freely elected by the workers.</p>									
<p><b>7.6 Criteria: Discrimination</b></p>										
<p><b>Compliance criteria (Required Client Actions):</b></p>										
7.6.1	<p><b>Indicator:</b> Workers do not suffer any discrimination [75] from the employer or other workers</p> <p><b>Requirement:</b> Yes</p> <p><b>Applicability:</b> All</p>	<p>a. Provide and ensure the implementation of an anti-discrimination policy, stating that the company does not engage/support discrimination in hiring, remuneration, access to training, promotion, termination or retirement based on race, caste, national origin, religion, disability, gender, sexual orientation, union membership, political affiliation, age or any other condition that may give rise to discrimination.</p>	<p>The farm had its own anti-discrimination policy in place and it stated that the farm could not engage/support discrimination in hiring, remuneration, access to training, promotion, termination or retirement based on race, caste, national origin, religion, disability, gender, sexual orientation, union membership, political affiliation, age or any other condition that might give rise to discrimination.</p>	1			NA, no social audit conducted			
		<p>b. Maintain records of employees' salary changes, promotions and training opportunities. For first audits, farm records must cover ≥ 6 months.</p>	<p>The farm maintained a written procedure to set up the basic salaries to workers based on their education background. According to the documents, there were no salary changes or promotions happened in this year and the training courses were provided to each worker of the farm.</p>	1			NA, no social audit conducted			
		<p>c. Provide and ensure the implementation of a policy protecting pregnant and lactating mothers.</p>	<p>The farm had its own policy in place to protect pregnant and lactating mothers. According to management and employees' interview, there were no pregnant workers and lactating mothers were reported at the farm.</p>	1			NA, no social audit conducted			
Footnote	<p>[75] Including but not limited to: race, caste, origin, color, gender, age, disability, religion, sexual orientation, resident or migrant, union and political affiliations.</p>									
<p><b>7.7 Criteria: Fair and progressive practices toward workers (including disciplinary practices)</b></p>										
<p><b>Compliance criteria (Required Client Actions):</b></p>										
7.7.1	<p><b>Indicator:</b> Employers treat all workers with dignity and respect</p> <p><b>Requirement:</b> Yes</p> <p><b>Applicability:</b> All</p>	<p>a. Ensure that all employees are consistently treated with dignity and respect (e.g. no physical abuse).</p>	<p>Based on employees' interview, they were all treated equally with dignity and respect without any physical abuse.</p>	1			NA, no social audit conducted			
		<p>b. Ensure that no deductions in pay are made for disciplinary actions (e.g. for the accidental breaking of equipment)</p>	<p>Based on the payroll review and employees' interview, no deductions would be made for disciplinary actions in this farm.</p>	1			NA, no social audit conducted			
				1						
<p><b>7.8 Criteria: Working hours</b></p>										
<p><b>Compliance criteria (Required Client Actions):</b></p>										
7.8.1	<p><b>Indicator:</b> Maximum number of regular working hours</p> <p><b>Requirement:</b> 8h/day or 48h/week (although these do not have to be consecutive hours)</p> <p><b>Applicability:</b> All</p>	<p>a. Maintain timesheets for all employees. For first audits, farm records must cover ≥ 6 months.</p>	<p>The farm kept the latest 2 years' time sheets and the time sheets from June to December 2012 were provided for review.</p>	1			NA, no social audit conducted			
		<p>b. Ensure that the regular time worked by farm workers does not exceed 8h/day or 48h/week</p>	<p>According to the provided time sheets, the workers in the farm worked for 8 hours per day (from 6:00 to 10:30 and from 13:30 to 17:00) and 6 days per week.</p>	1			NA, no social audit conducted			
				1						
7.8.2	<p><b>Indicator:</b> Workers have the right to leave the farm after completing the standard work-day</p> <p><b>Requirement:</b> Yes</p> <p><b>Applicability:</b> All, Farm-Wide</p>	<p>a. Ensure that workers can leave the farm during their allocated free time (i.e. any time when they are not working).</p>	<p>Based on employees' interview, workers could leave the farm whenever there was a need. Even if during the working time, they could ask for leave without any interference.</p>	1			NA, no social audit conducted			
		<p>b. Maintain copies of employees contract and ensure that labor contracts clearly state workers' right to leave</p>	<p>Both the employer and employees maintained the copies of employees contract and it clearly stated that workers could leave the farm after finished the standard work. But if there was any urgency happened during the working time, they could also ask for leave.</p>	1			NA, no social audit conducted			
				1						
7.8.3	<p><b>Indicator:</b> Minimum time off</p> <p><b>Requirement:</b> Two nights/week off if residing on the farm and a total of four days/month off for all workers</p> <p><b>Applicability:</b> All, Farm-Wide</p>	<p>a. Ensure that all workers residing at the farm have the right to 2 nights off/week</p>	<p>Based on provided time sheets, no night work had ever been arranged to all workers, including those who lived in the farm dormitory.</p>	1			NA, no social audit conducted			
		<p>b. Ensure that all workers have at least 4 days/month off</p>	<p>Based on provided time sheets, at least 4 days rest were provided to each worker every month.</p>	1			NA, no social audit conducted			
		<p>c. Maintain timesheets for all employees (as in 7.8.1a). For first audits, farm records must cover ≥ 6 months.</p>	<p>The farm kept the latest 2 years' time sheets and the time sheets from June to December 2012 were provided for review.</p>	1			NA, no social audit conducted			
				1						
7.8.4	<p><b>Indicator:</b> Overtime hours</p> <p>1- Are voluntary</p> <p>2- do not exceed a maximum of 12 hours per week</p> <p>3- occur on an exceptional (not regular) basis</p> <p>4- are paid at a premium rate [76], (i.e. an additional 20% is paid to the normal salary)</p> <p><b>Requirement:</b> Yes</p> <p><b>Applicability:</b> All, Farm-Wide</p>	<p>a. Ensure that for all employees, overtime hours:</p> <ul style="list-style-type: none"> <li>- are voluntary</li> <li>- do not exceed a maximum of 12h/week</li> <li>- occur on an exceptional basis</li> <li>- are paid at a premium rate (following the local/national regulation and at least 20% more than normal salary)</li> </ul>	<p>According to employees' interview, workers could work on overtime at their own wills and they could refuse to work on overtime. The provided time sheets showed that the maximum overtime work of each week were 8 hours with sufficient payment in compliance with local law.</p>	1			NA, no social audit conducted			
		<p>b. Maintain timesheets for all employees (as in 7.8.1a). For first audits, farm records must cover ≥ 6 months.</p>	<p>The farm kept the latest 2 years' time sheets and the time sheets from June to December 2012 were provided for review.</p>	1			NA, no social audit conducted			
		<p>c. Maintain copies of employees' contracts and ensure that employees' contracts state the overtime conditions and associated rights</p>	<p>According to the copies of employee's labor contracts maintained by the farm, regular working hour, overtime working hour and all the other overtime conditions were clearly stated in the contracts.</p>	1			NA, no social audit conducted			
		<p>d. Maintain records of payments for overtime hours</p>	<p>Based on the provided payroll records from June to November 2012, all the payments for overtime hours were included in the payroll records.</p>	1			NA, no social audit conducted			
				1						
Footnote	<p>[76] Premium rate: A rate of pay higher than the regular work week rate. Must comply with national laws/regulations and / or industry standards. Must be 120% of normal rate or higher.</p>									
<p><b>7.9 Criteria: Fair and decent wages</b></p>										
<p><b>Compliance criteria (Required Client Actions):</b></p>										

7.9.1	<p><b>Indicator:</b> The employer pays at least minimum wages as defined by law, or ensures that wages cover basic needs [77], plus some discretionary income [78], whichever is higher</p> <p><b>Requirement:</b> Yes</p> <p><b>Applicability:</b> All, Farm-Wide</p>	a. Obtain legal documents showing minimum wages for the location where the farm operates.	The farm provided the legal announcement showing the minimum wage standard of this area. The data was issued by local government and each company would receive it. According to the legal minimum wage standard, the local standard was VND 1,550,000 per month.	1		NA, no social audit conducted			
		b. If minimum wage has not been established by law, calculate basic needs wages, in consultation with workers and their representative organizations, and cost of living assessments from credible sources. Document the process and ensure that all workers have access to it at reasonable times.	N/A. There was a minimum wage standard in this area, it is VND 1,550,000 per month.	1		NA, no social audit conducted			
		c. Maintain copies of employees' contract and ensure that at least minimum wages are paid to employees	Employees' contract stated that all workers should be paid at least minimum wage. And based on the provided payroll records, the wages paid to workers were all above the local minimum wage.	1		NA, no social audit conducted			
		d. Maintain receipts of salary payments. For first audit, receipts must cover > 6 months.	Based on employees' interview and payroll records review, all the payments were in cash, and paid around 10th of each month for the preceding month. Once worker received the payment, they would sign on the payrolls for confirmation.	1		NA, no social audit conducted			
Footnote	[77] Basic needs are determined by calculating the cost of the basic shopping basket needed for an adequate diet, the percentage of an average household's budget that goes to food and other necessary expenses, and the average size of a household in a given country. Recognized representative shopping basket surveys include those undertaken by national authorities and multi-lateral developmental agencies. A basic or living wage should be capable of sustaining 50% of an average-sized family with food, clean water, clothing, housing, transportation, schooling, obligatory tax payments, health care and an additional 10% discretionary income (SA8000). An employer shall minimally pay a full-time worker the basic needs wage (without financial deductions) or national legal minimum wage; whichever is higher. The basic needs wage/living wage refers to "take home payment". Any obligatory expenses at the side of the employee/worker (e.g., uniform, tools and lunches) will not bring "take home" pay below a basic needs standard.								
Footnote	[78] For guidance and methods for basic needs wage calculation, see SA8000 Guidance Document.								
7.9.2	<p><b>Indicator:</b> Workers have the right to know the mechanism for setting the wages and benefits</p> <p><b>Requirement:</b> Yes</p> <p><b>Applicability:</b> All</p>	a. Provide a declaration stating the mechanism used for setting wages	The mechanism used for setting wages was explained to all employees at the beginning of employment and there was also a declaration posted onsite for workers acknowledgement.	1		NA, no social audit conducted			
		b. Ensure that employees are aware of the mechanism used for setting wages	Based on employees' interview, workers were aware of the mechanism used for wage setting. The farm also provided training records at the first beginning of employment.	1		NA, no social audit conducted			
7.9.3	<p><b>Indicator:</b> Wages shall be paid in cash or in a manner most convenient to workers</p> <p><b>Requirement:</b> Yes</p> <p><b>Applicability:</b> All</p>	a. Maintain records of the preferred method of payment for each employee	All employees worked in the farm were paid in cash.	1		NA, no social audit conducted			
		b. Maintain records of payments indicating the method of payment	There was an item listed in the labor contract that stated that all the payments would be paid in cash to workers every month.	1		NA, no social audit conducted			
<b>7.10 Criteria: Labor contracts</b>									
<b>Compliance criteria (Required Client Actions):</b>									
7.10.1	<p><b>Indicator:</b> Workers have copies of, and can understand, their labor contract [79]</p> <p><b>Requirement:</b> Yes</p> <p><b>Applicability:</b> All</p>	a. Ensure that employees have copies of their labor contracts	According to employees' interview, workers had been distributed copies of labor contracts.	1		NA, no social audit conducted			
		b. Ensure that employees understand their labor contracts	Based on employees' interview, they received a training from the employer to explain the items mentioned in labor contracts at the beginning of employment, and they all understood well of the items of labor contract.	1		NA, no social audit conducted			
Footnote	[79] Where verbal contracts are practiced (e.g., remote rural locations, cases of illiteracy and small family farms), extra care needs to be taken that the contents of the agreement are fully agreed to and well-understood. Cross interviews must take place to establish that the employer and the employee understand in the same way the terms of the verbal agreement.								
7.10.2	<p><b>Indicator:</b> Maximum length of probation period stated in the contract for workers, other than farm managers and workers with a university degree</p> <p><b>Requirement:</b> 1 month</p> <p><b>Applicability:</b> All</p>	a. Maintain copies of contracts of employees (other than farm managers and workers with a university degree) and ensure that the probation time is clearly stated and does not exceed 1 month	The copies of labor contracts indicated that one month probation period was required. Interviewed employees also reported that their probation period was one month.	1		NA, no social audit conducted			
		b. Ensure that probation times are understood by employees and respected	According to employees' interview, they all understood the probation times listed in the labor contracts.	1		NA, no social audit conducted			
7.10.3	<p><b>Indicator:</b> Maximum length of probation period stated in the contract for farm managers and workers with a university degree</p> <p><b>Requirement:</b> 2 months</p> <p><b>Applicability:</b> All</p>	a. Maintain copies of contracts of farm managers and workers with a university degree) and ensure that the probation time is clearly stated and does not exceed 2 months	Based on management interview and review of their labor contracts, the probation time for them was less than 2 months.	1		NA, no social audit conducted			
		b. Ensure that probation times are understood by employees and respected	According to employees' interview, they all understood the probation times and respected them.	1		NA, no social audit conducted			
<b>7.11 Criteria: Management system</b>									
<b>Compliance criteria (Required Client Actions):</b>									
7.11.1	<p><b>Indicator:</b> The employer ensures all workers have appropriate channels to communicate anonymously with employers on matters relating to labor rights and working conditions</p>	a. Maintain complaint boxes for employees throughout the farm.	According to plant tour in the farm, there were two complaint boxes installed on site.	1		NA, no social audit conducted			

	<p><b>Requirement:</b> Yes <b>Applicability:</b> All</p>	b. Ensure that workers are aware of the use of complaint boxes and are encouraged to use them by farm management	Instructions were posted under the complaint box and trainings were provided to workers as well.	1			NA, no social audit conducted			
7.11.2	<p><b>Indicator:</b> Percentage of issues raised by workers which are registered, tracked and responded to by the employer <b>Requirement:</b> 100% <b>Applicability:</b> All</p>	a. Maintain a register recording issues raised by workers (including complaint forms), date and response taken. For first audit, register must contain all records of the previous 6 months. b. Ensure that employees have access to the register at reasonable times	N/A. No complaints were raised so far, but the farm had the procedure in place on how to solve complaints from workers. Based on employees' interview, all employees could report their complaints whenever there was a need without any interference. And the box would be opened every month during the meeting with union.	1 1			NA, no social audit conducted NA, no social audit conducted			
7.11.3	<p><b>Indicator:</b> Percentage of complaints that are resolved [80] within one month after being received [81] <b>Requirement:</b> 90% <b>Applicability:</b> All</p>	a. Maintain evidence of issues raised by workers and being resolved. Evidence may include letters signed by employees or their representatives. b. Record the issues being resolved in the register as for 7.11.2a c. Maintain monthly summaries and calculations of the percentage of issues resolved within 1 month	N/A. No complaints were raised so far, but the farm had the procedure in place on how to solve complaints from workers. N/A. No complaints were raised so far, but the farm had the procedure in place on how to solve complaints from workers. N/A. No complaints were raised so far, but the farm had the procedure in place on how to solve complaints from workers.	1 1 1			NA, no social audit conducted NA, no social audit conducted NA, no social audit conducted			
Footnote		[80] Resolution of a conflict is defined as when both parties agree to remove it from the list of conflicts.								
Footnote		[81] Complaints include the ones coming from other resource users, employees and buyers (e.g., middlemen or processors).								
7.11.4	<p><b>Indicator:</b> A plan for addressing the yet to be resolved conflicts is developed and complied with <b>Requirement:</b> Yes <b>Applicability:</b> All</p>	a. Maintain a register recording issues raised by workers (as for 7.11.2a) and including the plan for addressing yet to be resolved conflicts b. Ensure that the plan is adhered to	N/A. No complaints were raised so far, but the farm had the procedure in place on how to solve complaints from workers. N/A. No complaints were raised so far, but the farm had the procedure in place on how to solve complaints from workers.	1 1			NA, no social audit conducted NA, no social audit conducted			
7.11.5	<p><b>Indicator:</b> Timeframe for the contracting [82] of suppliers and service providers that ensure suitable health and safety conditions for their workers [83] <b>Requirement:</b> Within 1 year from achieving certification <b>Applicability:</b> All</p>	a. For first audit, prepare a declaration of commitment to contract only suppliers and service providers that ensure suitable health and safety condition within 1 year. b. For subsequent audits, ensure that all health and safety conditions as indicated in these Requirements (i.e. within Criteria 7.1, 7.2 and 7.4) are respected by all the employees of suppliers and service providers who are working in the farm	The farm had a declaration of commitment in place to contract only suppliers and service providers that ensure suitable health and safety condition within 1 year. N/A. This is an initial audit.	1 1			NA, no social audit conducted NA, no social audit conducted			
Footnote		[82] Including either written or verbal contracts.								
Footnote		[83] As defined in these Requirements.								
7.12 Criteria: Record-keeping										
<b>Compliance criteria (Required Client Actions):</b>										
7.12.1	<p><b>Indicator:</b> Records of the hours worked by every worker employed in the farm are available <b>Requirement:</b> Yes <b>Applicability:</b> All, Farm-Wide</p>	a. Maintain timesheets for all employees. For first audits, farm records must cover > 6 months. b. Maintain a list of all employees employed in the farm	The farm kept the latest 2 years' time sheets and the time sheets from June to December 2012 were provided for review. A list of all employees hired by the farm was maintained in the farm.	1 1			NA, no social audit conducted NA, no social audit conducted			
7.13 Criteria: Participatory social impact assessment for local communities.										
<b>Compliance criteria (Required Client Actions):</b>										
7.13.1	<p><b>Indicator:</b> A participatory Social Impact Assessment (p-SIA) [84] is conducted (See Annex F for more information) <b>Requirement:</b> Yes <b>Applicability:</b> All</p>	a. Provide a p-SIA inclusive of all items reported in Annex F. For large scale farms (e.g. vertically integrated operations) the p-SIA must be commissioned to professional experts. A new p-SIA should be conducted at least every 3-years. b. For large scale farms, provide evidence of the experience of the professional experts commissioned. Evidence must indicate a track record of at least 3 years conducting participatory consultations with rural communities	A p-SIA report including all items in Annex F was provided to auditor for review, it was prepared in July 2012. But since this was not a large scale farm, so they don't need the professional expert. N/A. It was not a large scale farm but with only 42 employees.	1 1			NA, no social audit conducted NA, no social audit conducted			
Footnote		[84] p-SIA: An assessment of positive and negative consequences and risks of a planned or ongoing project (e.g., a farm or farm development) undertaken in such a manner that all stakeholder groups have input in process, results and outcome of such an assessment, and that steps taken and information gathered is openly accessible to all.								
7.13.2	<p><b>Indicator:</b> Local communities [85], local government and at least one civil society organization chosen by community have a copy of the p-SIA in locally appropriate language <b>Requirement:</b> Yes <b>Applicability:</b> All</p>	a. Maintain records of all the people having received copy of the p-SIA b. Obtain signatures from at least 50% of the people having received the p-SIA. The people signing must include at least: a representative of the local community (if such a representative can be identified by the majority of the community), a representative of the local government and one civil society organization (if available).	According to the provided records, it was noted that all the people having received copies of the p-SIA on July 12, 2012. All people received copies of the p-SIA on July 12, 2012 and the record with their signatures was provided.	1 1			NA, no social audit conducted NA, no social audit conducted			
Footnote		[85] Community: A group of people with possibly diverse characteristics who are linked by social ties, share common perspectives, and are joined by collective engagements within a geographically confined area. Four common indicators are 1.) a state of organized society in small form (town, village, hamlet) that recognizes a single representative (leader, formal or informal); 2.) the people inside a confined geographical area; small enough to allow face-to-face interaction as the main form of contact between the individuals within the group; 3.) having a common good or a common interest and recognizing that, and been recognized as having that; and 4.) A sense of common identity and characteristics (i.e., "we" versus "them" feeling) on either/or social, cultural, economic, ethnic grounds.								
7.14 Criteria: Complaints by local communities										
<b>Compliance criteria (Required Client Actions):</b>										
7.14.1	<p><b>Indicator:</b> A verifiable conflict resolution policy [86], [87], for local communities is developed and applied <b>Requirement:</b> Yes <b>Applicability:</b> All</p>	a. Prepare and ensure the application of a conflict resolution policy for local communities b. Maintain records of all the people having received copy of the policy c. Obtain signatures from at least 50% of the people having received copies of the policy. The people signing must include at least: a representative of the local community (if such a representative can be identified by the majority of the community), a representative of the local government and one civil society organization (if available).	A conflict resolution policy for local communities was provided for review. The farm maintained the records to indicated that all the people having received the copies of the policy. All the people having received the copies of the policy. According to the signing record, there were the representatives from the local community, local government and the civil society organization.	1 1 1			NA, no social audit conducted NA, no social audit conducted NA, no social audit conducted			

		d. Maintain records of meetings (at least twice per year) held with local communities to identify and resolve conflicts. Records must include list of participants, agendas and agreed action plan and summaries. For first audits records must cover at least one meeting (this could be part of the p-SIA process if the p-SIA was conducted less than 6 months before the audit)	The meeting minutes were kept for the meeting held with local communities to identify and resolve conflicts. The record included a list of participants, agendas and agreed action plan and summaries. However, there were no any conflicts happened or complaints raised from the local community.	1			NA, no social audit conducted				
Footnote	[86] The policy shall state how conflicts and complaints will be tracked transparently and explain how to respond to all received complaints.										
Footnote	[87] The process of resolution is documented and meetings are summarized. Summaries include an agenda (the list of concerns), resolutions or agreements reached, who shall take what action by when, and a list of participants. Local government and at least one civil society or customary organization chosen by the community shall have access to the conflict resolution process and the documentation thereof. A conflict is deemed resolved if both parties in the negotiation process have agreed to take it off the agenda.
