### **AQUACULTURE STEWARDSHIP COUNCIL – ASC SALMON STANDARD, VERSION 1, JUNE 2012**

This certificate is valid for the following Scope:  
Production of Atlantic salmon, *Salmo salar*

Point at which the certified products may enter a Chain of Custody:

Products are authorised to enter an ASC Chain of Custody certification at the point where the fish leave production cages. At this point the farm's practical and direct control of the fish stops and farm ASC Salmon Standard certificate scope ends. When the harvest process starts, the Harvest plant MSC CoC certificate takes over. This is the case for harvest of fish from MHN Skipningsdalen site.
